Chairman: Ghazali Mustapha, Ph.D.

Faculty: Educational Studies

This study aims to examine the kinds of strategies used by Indonesian secondary school students in learning English as a foreign language, and to determine how their use varies according to gender and field of study. It also aims to study the relationships between the use of language learning strategies and English language achievement and to determine which category of strategies is more predictive of English language achievement.

Three hundred students were selected as sample using proportional stratified random sampling. Data were gathered using a questionnaire to collect data on the use of language learning strategies, and achievement test to collect data on English language achievement. Data were analyzed using ANOVA and Chi-square to determine the variation in the use of language learning strategies. Pearson coefficient correlation was used to

study the relationships between the use of language learning strategies and English language achievement, and a stepwise multiple-regression model was used to determine which category of strategies is more predictive of English language achievement.

This study found that the use of language learning strategies by Indonesian secondary school students can be categorized or considered as a moderate use, indicated with overall mean score (3.0), the range of the mean scores of the six categories of strategies (from 2.8 to 3.4), and the percentage of individual strategies that were used at middle level of use (62%).

Another finding of this study was that the use of language learning strategies significantly varied by gender and field of study. Female students used language learning strategies significantly more often than males students, and students who majored in exact science used language learning strategies significantly more often than those who majored in social science.

It was also found that the use of overall strategies and the six categories of strategies except affective strategies and English language achievement were correlated significantly. Of the six categories of strategies, only compensation, affective and cognitive strategies provide a positive and significant contribution for the total variation in English language achievement. These three categories of strategies jointly accounted for 28 percent of the grade variability in English language achievement.

Abstrak tesis yang dikemukakan kepada Senat Universiti Putra Malaysia
sebagai memenuhi syarat keperluan untuk ijazah Master Sains

**PERSEPSI TERHADAP STRATEGI BELAJAR BAHASA YANG
DIGUNAKAN OLEH PELAJAR SEKOLAH MENENGAH INDONESIA
MENGIKUT JANTINA DAN BIDANG KAJIAN SERTA KAITANNYA
DENGAN PRESTASI PENCAPAIAN BAHASA INGGERIS**

Fakulti: Pengajian Pendidikan

Kajian ini bertujuan untuk mengenali strategi belajar yang digunakan oleh pelajar sekolah menengah Indonesia dalam mempelajari bahasa Inggeris dan menyelidiki sama ada penggunaannya berbeza secara bererti mengikut jantina dan bidang kajian. Kajian ini juga bertujuan mengkaji hubungan diantara penggunaan strategi belajar berbahasa dengan prestasi pencapaian bahasa Inggeris serta mendapatkan kelompok strategi yang lebih prediktif bagi pengiraan prestasi pencapaian bahasa Inggeris.

Seramai 300 orang pelajar sekolah menengah tingkatan 6 di Bandar Padang, Sumatra Bahagian Barat, Indonesia, dipilih sebagai subjek kajian secara rawak berkadar berlapis. Instrumen yang digunakan adalah soal selidik dan ujian pencapaian. Data dianalisa menggunakan pelbagai teknik

statistik pentadbiran. ANOVA dan Khi kuasa dua digunakan untuk melihat variasi penggunaan strategi belajar mengikut jantina dan bidang kajian. Pekali hasil darab Pearson digunakan untuk melihat kaitan diantara penggunaan strategi belajar dan prestasi pencapaian bahasa Inggeris. *Stepwise* regresi linear pelbagai digunakan untuk mengenali kelompok strategi yang lebih prediktif bagi pengiraan prestasi pencapaian bahasa Inggeris.

Kajian ini mendapati bahawa penggunaan strategi belajar berbahasa oleh pelajar sekolah menengah Indonesia tergolong kepada tingkat penggunaan sederhana. Fakta ini ditunjukkan oleh purata penggunaan strategi secara keseluruhan (3.0) dan secara kelompok (dengan julat 2.8 hingga 3.4), dan peratus strategi perseorangan yang digunakan pada tingkat sederhana (62%). Kajian ini mendapati pula bahawa pelajar perempuan secara bererti lebih sering menggunakan strategi belajar berbahasa berbanding dengan pelajar lelaki. Pelajar dengan bidang kajian sains tulen secara bererti lebih sering menggunakan strategi belajar berbanding dengan pelajar dalam bidang kajian sains sosial.

Kajian ini juga mendapati bahawa penggunaan strategi belajar berbahasa mempunyai kaitan yang bererti dengan prestasi pencapaian bahasa Inggeris. Kelompok '*compensation*', '*affective*' dan '*cognitive*' yang memberi kontribusi positif dan bererti bagi pengiraan pencapaian prestasi bahasa Inggeris dan ketiga kelompok strategi ini memberikan kontribusi 28% terhadap total variasi dalam prestasi pencapaian bahasa Inggeris.

ACKNOWLEDGEMENTS

First of all, the researcher would like to express his sincere gratitude to ‘*Allah*’ for his most gracious and merciful. Without his blessing and grace, he would not be able to complete this thesis as it comes up as it is.

His sincere gratitude is addressed to Ghazali Mustapha, Ph.D., the Chairman of his committee, for his invaluable guidance and supervision in writing this thesis. He is sure that without his guidance, help and patience, this thesis will never be finished. His sincere gratitude is also addressed to Associate Professor Malachi Edwin Vethamani, Ph.D. and Professor Turiman bin Suandi, Ph.D., the members of his committee, for their patience in correcting this thesis and giving helpful comments and suggestions.

His sincere gratitude is also addressed to Rector of Bung Hatta University, Deputy Chancellor of Universiti Putra Malaysia and the Dean of School of Graduate Studies Universiti Putra Malaysia for their admission to take master’s degree at School of Graduate Studies, Universiti Putra Malaysia. His deepest thank is also addressed to the Chairperson of English Department and the Dean of Teachers Training Faculty of Bung Hatta University for releasing him from his duty and for their support. He also would like to express his sincere thank to Bung Hatta Education Foundation for its scholarship to finance his study for master’s degree at School of Graduate Studies Universiti Putra Malaysia. His thank also goes to the

headmasters, vice headmasters and English teachers at 'SMUN' 2, 'SMUN' 5, 'SMUN' 6, 'SMUN' 7, and 'SMUN' 10 for their help and their admission of collecting data of this study at their schools.

His gratitude is also addressed to Fauziah Hasan, Ph.D., his academic advisor, for her help during his study and for her recommendation to get the right chairman of his committee. His sincere thank also goes to all lecturers, professors and administrative staffs at Faculty of Educational Studies, Universiti Putra Malaysia. He also would like to express his sincere gratitude to Prof. Dr. Mukhaiyar, M.Pd. and Drs. Syofyan Adam for their support and recommendation. His sincere thank also goes to Dra. Lely Refnita, M.Pd. for her willingness to read and check the correctness of the translation of SILL into Indonesian language.

His sincere gratitude is also addressed to his parents, his siblings, his parents in law, his brothers and sisters in law, and his relatives for keeping on encouraging him and praying to 'Allah' for his success.

Last but not least, his sincere and special gratitude is due to his beloved wife, Adriyani, S.E., for her constant love and support. During his study, she has taken responsibility fully for taking care of his sons and never stops praying to 'Allah' late in the night for his success, and to his loving sons; Ogi Aulia Rahmat, Fariz Tsanana Rahmat and Halim Al-hawari Salasa Rahmat, for providing the joy and laughter that seem to be the panacea for his stress.

I certify that an Examination Committee met on July 13, 2004 to conduct the final examination of Khairul on his master's thesis entitled "Perception of Language Learning Strategies Used by Indonesian Secondary School Learners according to Gender and Field of Study and Their Relationships with English Language Achievement" in accordance with Universiti Pertanian Malaysia (Higher Degree) Act 1980 and Universiti Pertanian Malaysia (Higher Degree) Regulations 1981. The Committee recommends that the candidate be awarded the relevant degree. Members of the Examination Committee are as follows:

Jamaliah Abd. Hamid, Ph.D.
Lecturer
Faculty of Educational Studies
Universiti Putra Malaysia
(Chairman)

Arshad Abdul Samad, Ph.D.
Lecturer
Faculty of Educational Studies
Universiti Putra Malaysia
(Internal Examiner)

Fauziah Hassan, Ph.D.
Lecturer
Faculty of Educational Studies
Universiti Putra Malaysia
(Internal Examiner)

Mildred Nalliah, Ph.D.
Associate Professor
Center of Pedagogical Studies
Universiti Sains Malaysia
(External Examiner)

ZAKARIAH ABDUL RASHID, Ph.D.
Professor/Deputy Dean
School of Graduate Studies
Universiti Putra Malaysia

Date:

This thesis submitted to the Senate of Universiti Putra Malaysia and has been accepted as fulfilment of the requirements for the degree of Master of Science. The members of the Supervisory Committee are as follows:

Ghazali Mustapha, Ph.D.

Lecturer
Faculty of Educational Studies
Universiti Putra Malaysia
(Chairman)

Malachi Edwin Vethamani, Ph.D.

Associate Professor
Faculty of Educational Studies
