OIL PALM (*Elaeis guineensis*)

Elaeis guineensis is a species of palm commonly just called oil palm, but also sometimes African oil palm or macaw-fat. The species is also now naturalised in Madagascar, Sri Lanka, Malaysia, Indonesia, Central America, the West Indies and several islands in the Indian and Pacific Oceans.

SUPPORTING AGRICULTURAL NETWORKS AND COMMUNITIES THROUGH AGRI@UPM

INTRODUCTION

The Agri@UPM portal, available through the library of Universiti Putra Malaysia (UPM), is a dedicated resource for packaging information on agriculture. This portal is tailored to support the academic and research needs of the agricultural community at UPM.

<http://agriculture.upm.edu.my>

OBJECTIVE

AGRI TIPS, EXPERTISE & VIDEOS

AGRI TIPS

Collection of advise, recommendation and instruction from various sources in agriculture field.

AGRI EXPERTISE

Display a list of expertise in agriculture field.

AGRI VIDEO

Collections of agriculture video that is useful for getting tips, new research info and etc.

1

To improve knowledge sharing, support informed decision-making, and promote innovation in the agricultural sector.

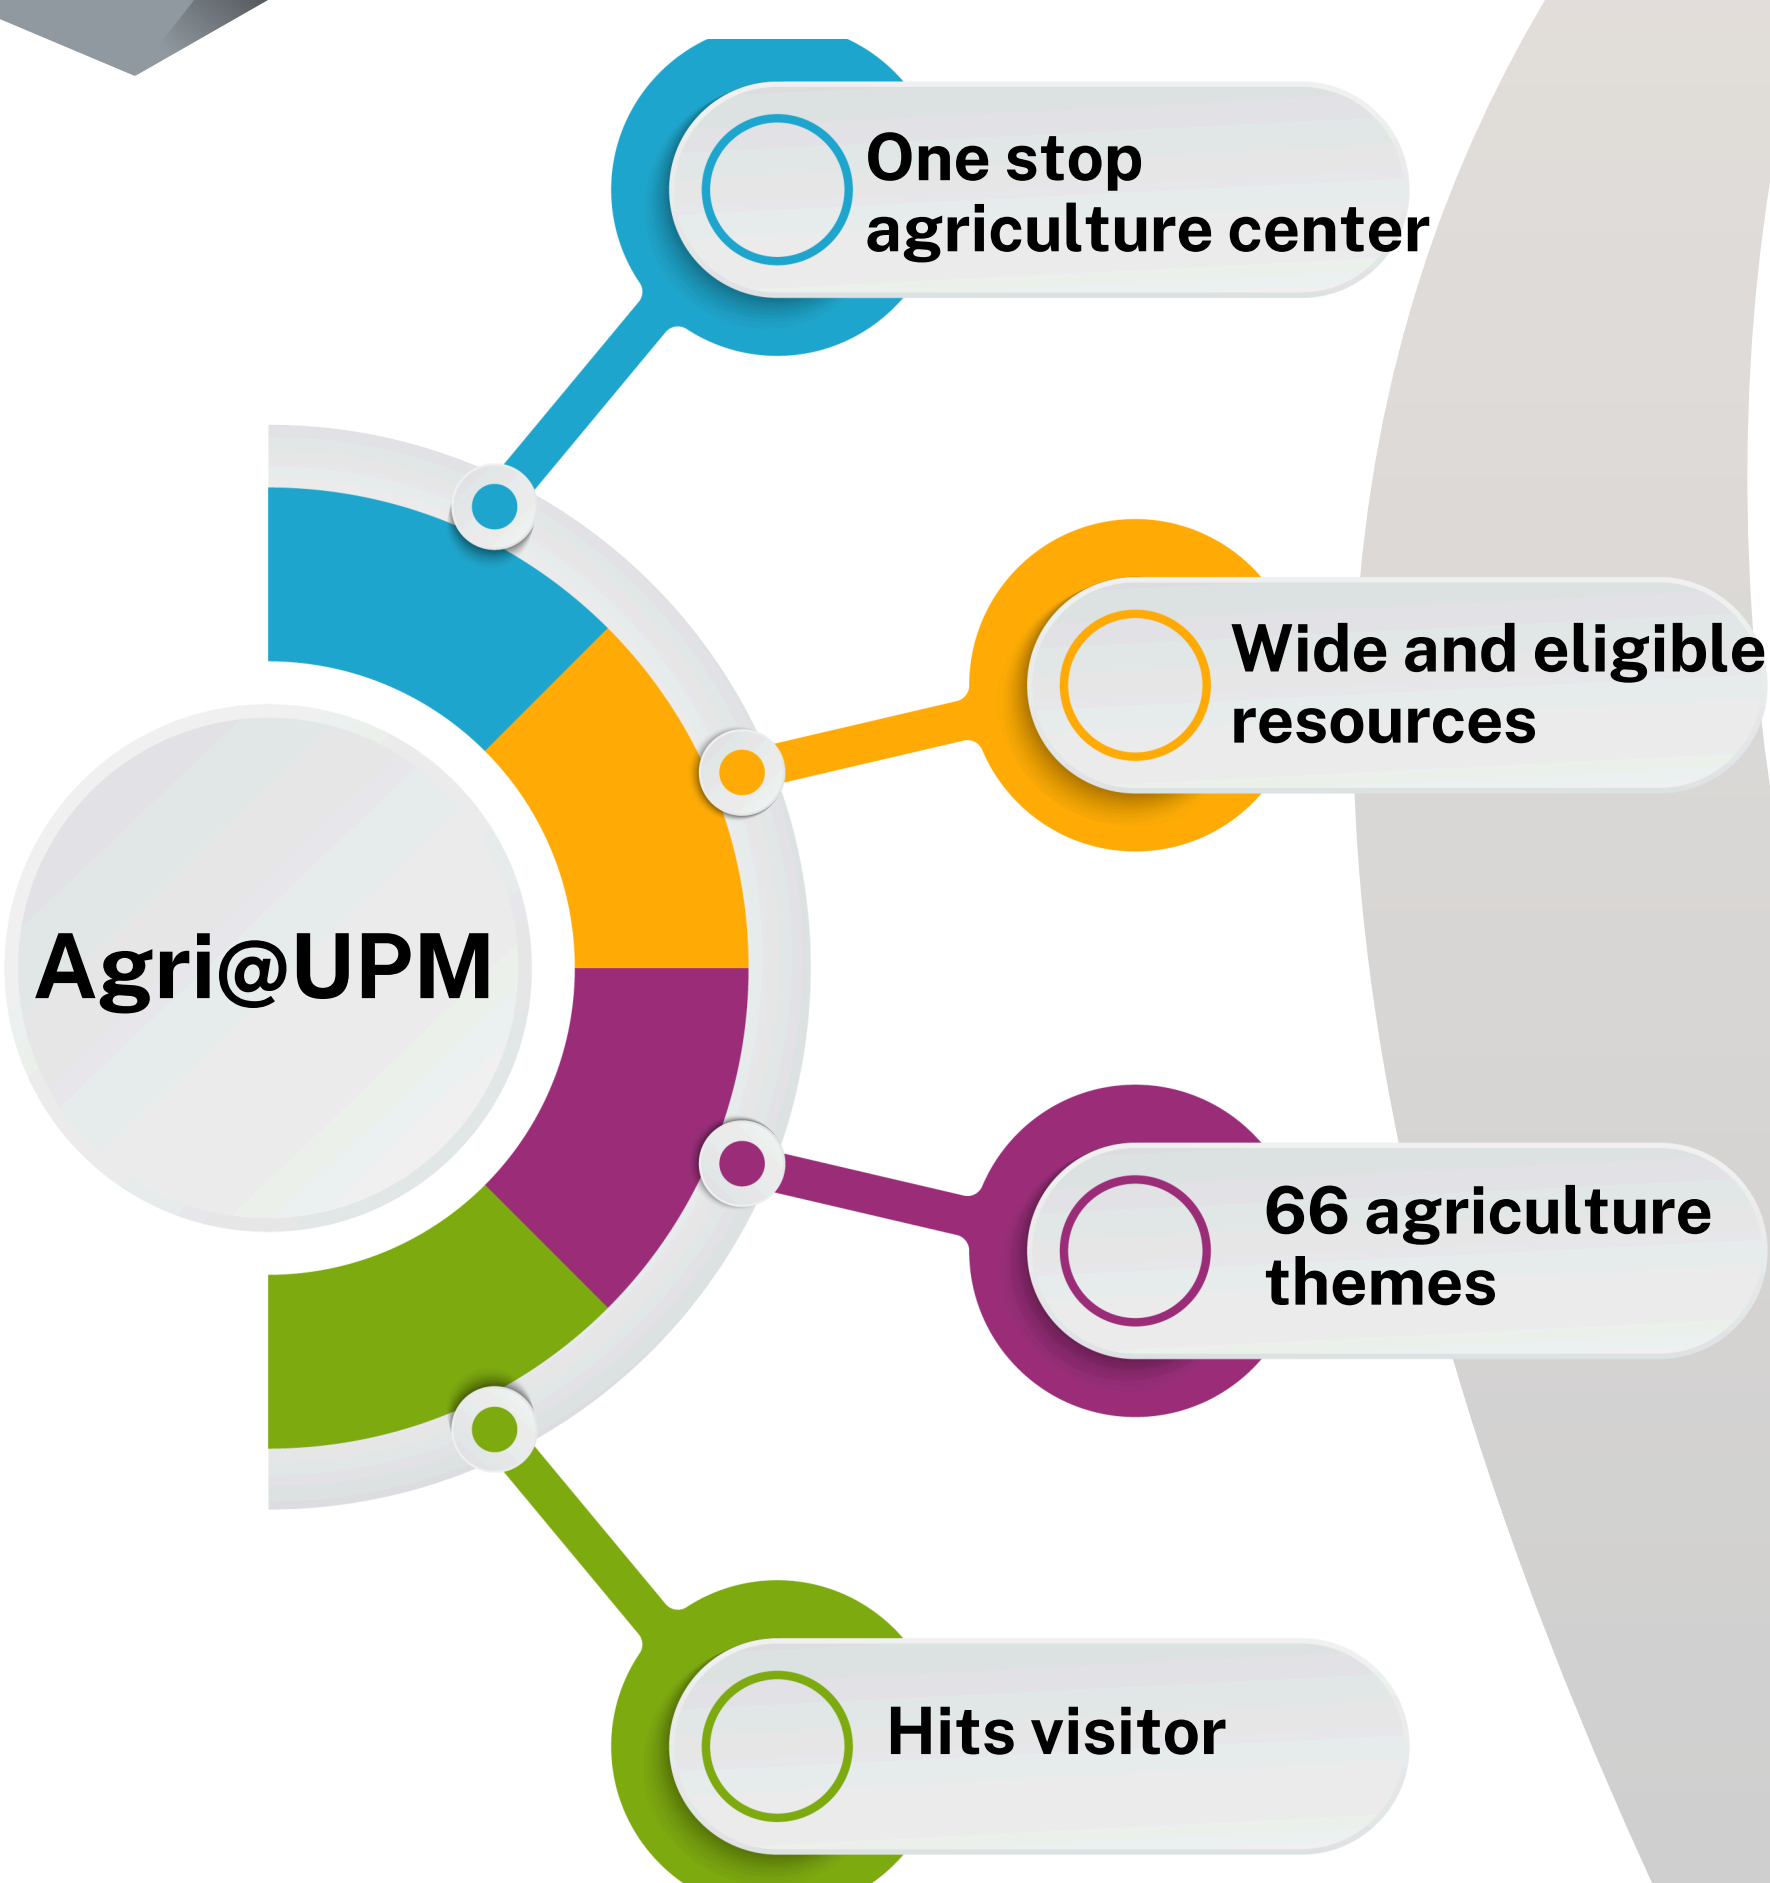

2

To provide comprehensive, easily accessible information from eligible sources.

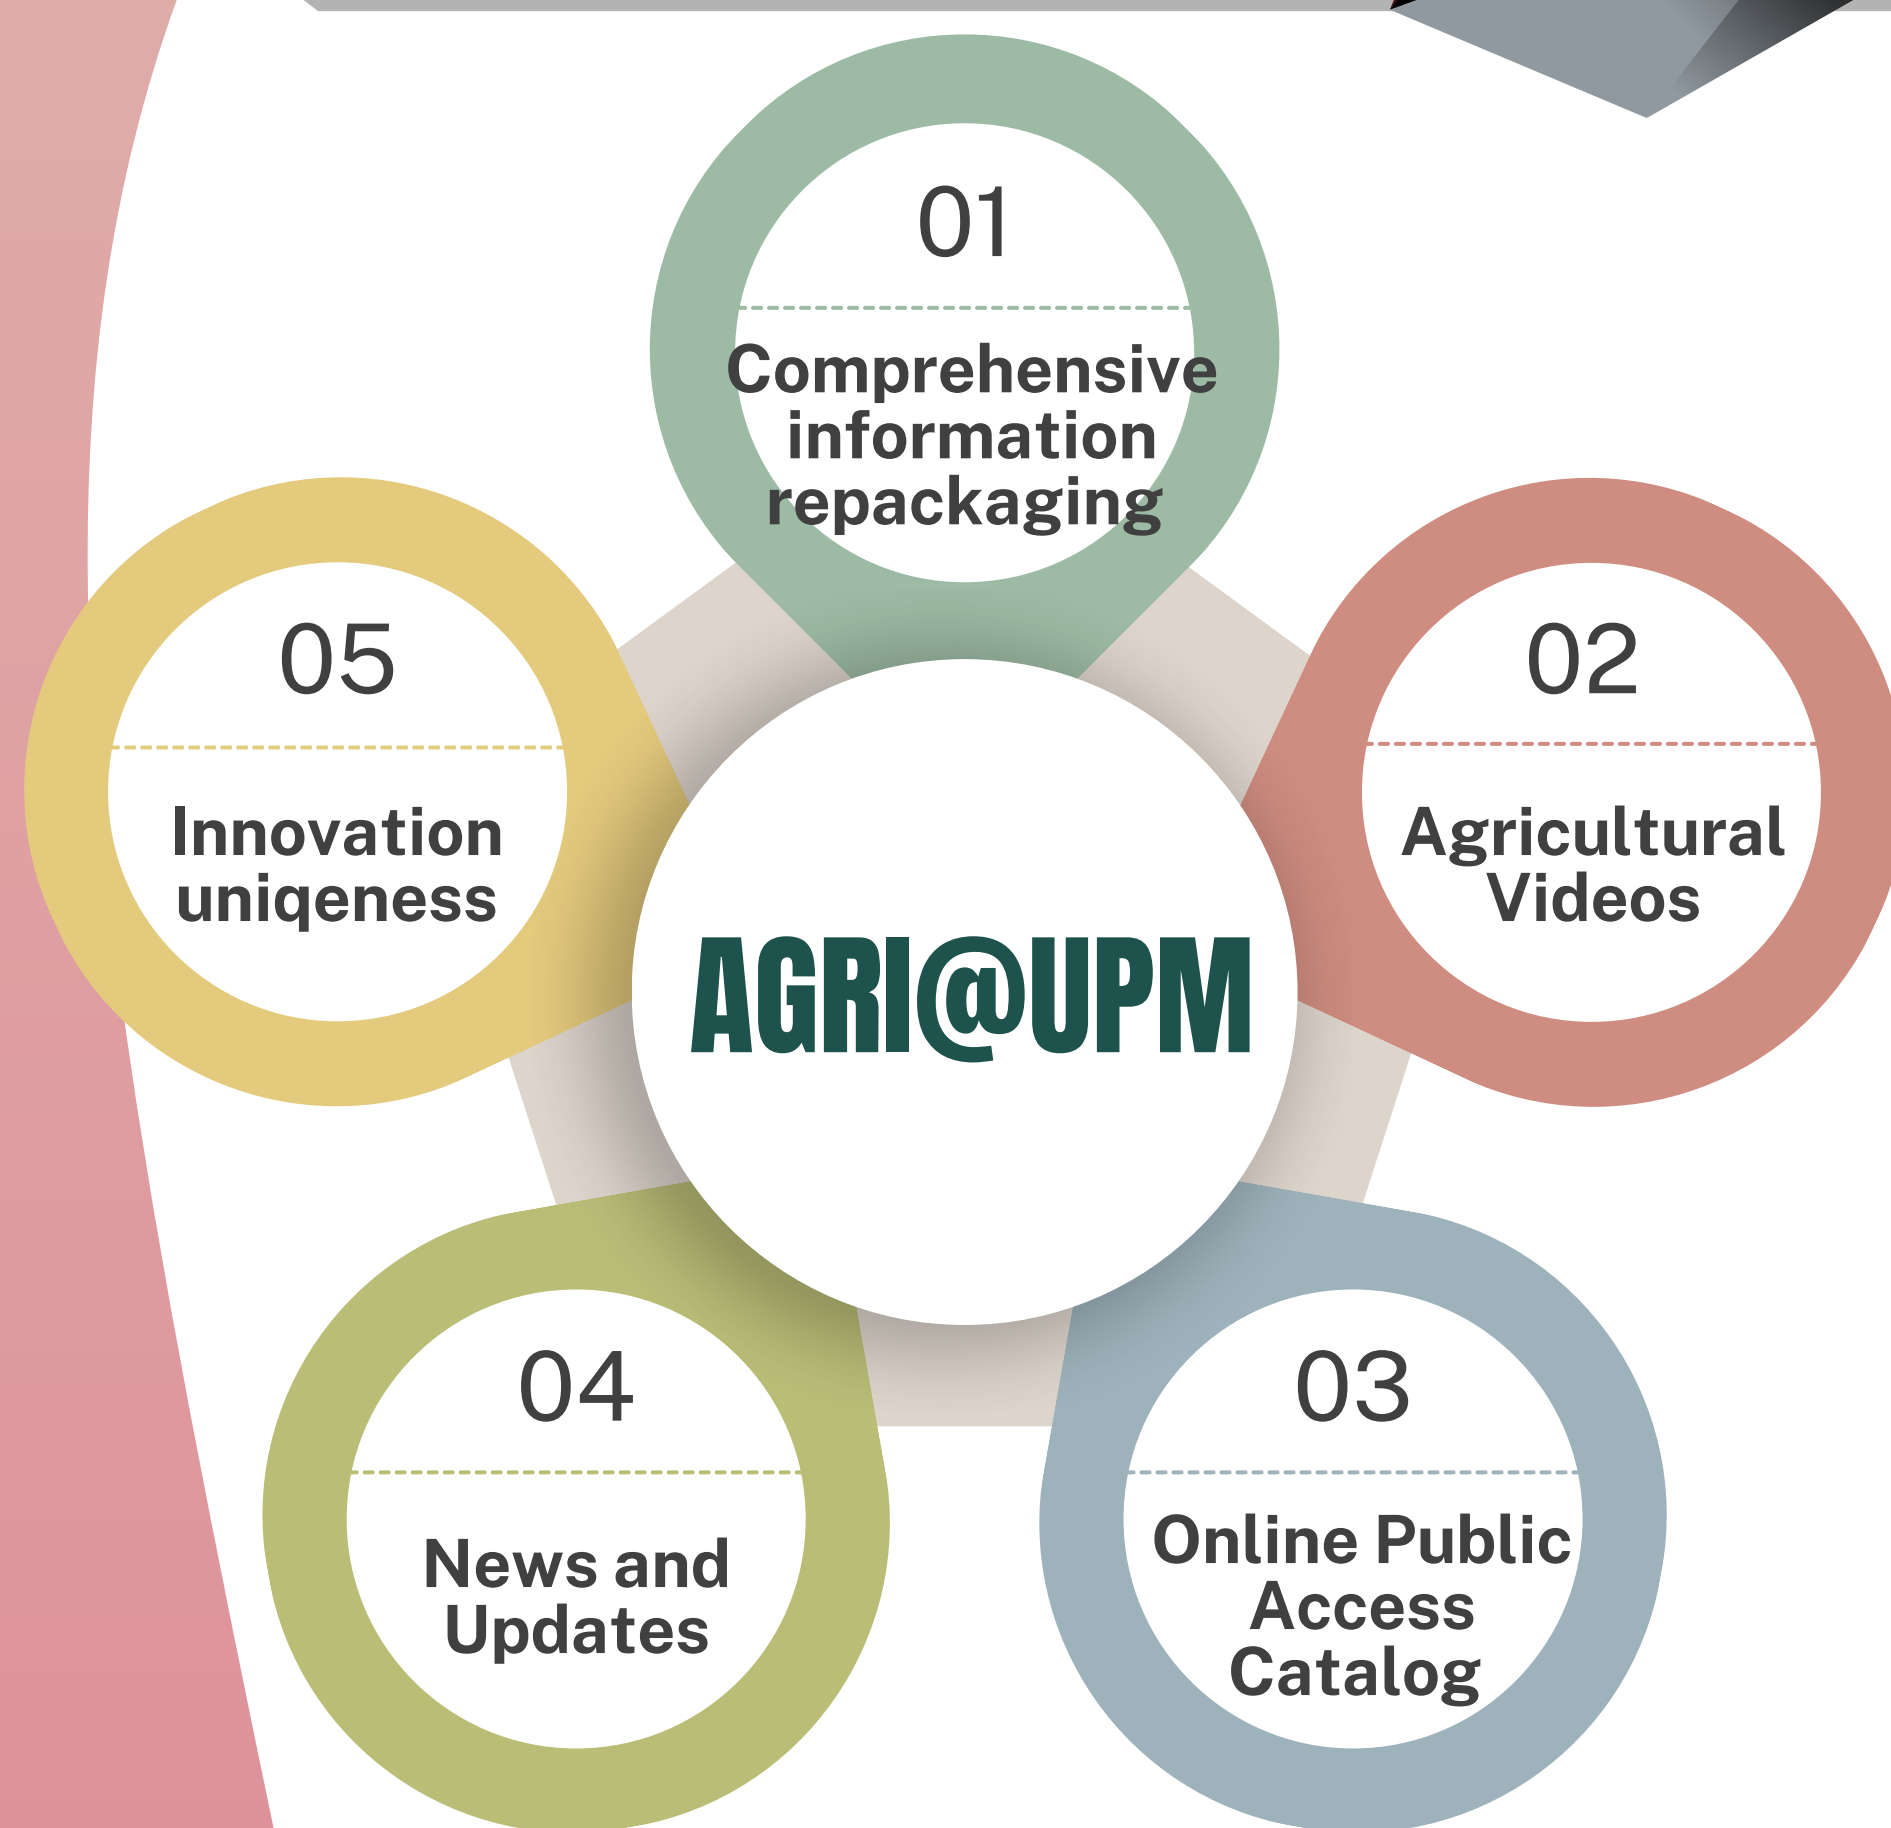

3

To improve farming practices, maximize productivity, and achieve sustainable success.

CONCLUSION

The Agri@UPM portal serves as a comprehensive and user-friendly resource, providing the agricultural community at UPM with high-quality, relevant, and up-to-date information to support their research and academic endeavors.

The plans include continually updating the portal, expand technological resources, and integrate real-time interactive problem-solving and community engagement tools to maximize access to key agricultural data and advance the field.
