**Thesis Submitted to the School of Graduate Studies, Universiti Putra Malaysia,
in Fulfilment of the Requirements for the Degree of Doctor of Philosophy**

September 2011

DEDICATION

This thesis is dedicated to:

Late Imam Khomeyni, the enlightener and messiah of Iranian people, and my dear family, whom have supported, encouraged and devoted for my success specially my father GholamHossein, mother Zahra, wife Fatemeh, sons Mohammad Reza and Amir Reza.

Abstract of thesis presented to the Senate of Universiti Putra Malaysia in fulfilment of the requirement for the degree of Doctor of Philosophy

**RELATIONSHIPS BETWEEN MANAGEMENT FUNCTIONS AND
FAMILY ECONOMIC STATUS AMONG KERMAN HOUSEHOLDS IN
IRAN**

By

MEHDI YADOLLAHI

August 2011

Chairman: Laily HajiPaim, PhD

Faculty: Human Ecology

This study was undertaken to determine the relationships between management functions and family economic status. Management functions (independent variables) comprises of planning, organizing, coordinating, directing, and controlling; whereas family economic status, (dependent variable) comprising three dimensions of income, expenditure, and assets. The specific objectives of this research are; to determine, the economic status of the families in Kerman City, the level of managerial functions practice by the families, the relationship between the levels of managerial functions practiced and family economic status, the effect of demographic variables on family economic status, and finally, to determine the factors affecting family economic status.

The head of the households are respondents of the study. The population of the study was households in Kerman City. The instruments used for this study is a set

of questionnaire consisting of three sections. The first section focuses on information concerning the demographic characteristics; the second section consists of managerial functions, and the last section of the questionnaire concerns family economic status, including income, wealth and expenditure (consumption).

The data collection was done through face-to-face interviews to obtain information from the heads of the households and other members of the family. The interviews were carried out between November 2008 and January 2009. The areas and respondents were selected by cluster random sampling. The sample consists of 390 households from five areas in Kerman City, Iran. The quantitative data was analysed using various descriptive and correlation statistics, including chi-square, independent sample t-test, Pearson product moment correlation, Spearman rho, and multinomial logistic regression.

Regarding Kerman's family economic status, findings revealed that Kerman families' economic status is higher than average Iranian families. The findings of the study support the relationship between management functions and family economic status. Management functions, namely, planning, organizing, coordinating, directing, and controlling could be used to predict family economic status dimensions, namely, income, expenditure, and assets. Also, the findings of the study revealed that demographic variables, i.e. age, level of education, and occupation have significant correlations with family economic status.

The results of this study will be especially interesting to policy makers, teachers and students, family services agencies, professionals, non-government organizations and

heads of the households. Limitations of the study include the difficulty in obtaining information concerning the economic status of the families.

For future research, the replication of the study could be carried out to other societies or countries such as Malaysia. Further research is also needed to develop a new model and to identify the relationship between lifestyle or household leadership styles and family economic status.

Abstrak tesis yang dikemukakan kepada Senat Universiti Putra Malaysia sebagai memenuhi keperluan untuk ijazah Doktor Falsafah.

**HUBUNGAN ANTARA FUNGSI PENGURUSAN DAN TARAF EKONOMI
KELUARGA ANTARA ISIRUMAH KERMAN IN IRAN**

Oleh

MEHDI YADOLLAHI

Pengerusi: Laily Haji Paim, PhD

Fakulti: Ekologi Manusia

Kajian ini dijalankan untuk menentukan hubungan antara fungsi pengurusan dan status ekonomi keluarga. Fungsi pengurusan (pembolehubah bebas) terdiri daripada merancang, menyusun, menyelaras, mengarah dan mengawal; manakala status ekonomi keluarga (pembolehubah bersandar) terdiri daripada tiga dimensi iaitu pendapatan, perbelanjaan dan aset. Objektif khusus kajian ini adalah untuk menentukan, status ekonomi keluarga di Bandar Kerman, tahap amalan fungsi pengurusan oleh keluarga, hubungan antara tahap fungsi pengurusan yang diamalkan dan status ekonomi keluarga, pengaruh pemboleh ubah demografi ke atas status ekonomi keluarga dan akhirnya, untuk menentukan faktor yang mempengaruhi status ekonomi keluarga.

Dalam kajian ini, responden ialah ketua isi rumah. Populasi kajian pula ialah isi rumah di Bandar Kerman. Alat yang digunakan untuk kajian ini adalah borang soal selidik yang terdiri daripada tiga bahagian. Bahagian pertama menumpukan pada

maklumat tentang ciri-ciri demografi, bahagian kedua terdiri daripada fungsi pengurusan dan bahagian terakhir adalah tentang status ekonomi keluarga, termasuklah pendapatan, kekayaan dan perbelanjaan (penggunaan).

Pengumpulan data dijalankan melalui temu bual bersemuka untuk mendapatkan maklumat dari ketua isi rumah dan ahli keluarga yang lain. Temu bual dilakukan dari November 2008 hingga akhir Januari 2009. Lokasi dan responden dipilih menggunakan *cluster random sampling*. Sampel kajian terdiri daripada 390 isi rumah dari lima lokasi di Bandar Kerman, Iran. Data kuantitatif dianalisis menggunakan pelbagai statistik deskriptif dan korelasi, termasuklah chi-square, t-test, Pearson product moment correlation, Spearman rho dan *multinomial logistic regression*.

Berkaitan dengan status ekonomi keluarga Kerman, kajian mendapati bahawa status ekonomi keluarga Kerman lebih tinggi dari keluarga Iran di peringkat negara. Penemuan kajian menyokong hubungan antara fungsi pengurusan dan status ekonomi keluarga. Fungsi pengurusan, iaitu merancang, menyusun, menyelaras, mengarah, dan mengawal boleh digunakan untuk meramalkan dimensi status ekonomi keluarga, iaitu pendapatan, perbelanjaan, dan aset. Selain itu, penemuan kajian menunjukkan bahawa pembolehubah demografi, iaitu umur, tahap pendidikan, dan pekerjaan mempunyai korelasi yang signifikan dengan status ekonomi keluarga.

Hasil kajian amat berguna kepada pembuat dasar, guru dan pelajar, agensi perkhidmatan keluarga, profesional, organisasi bukan kerajaan dan ketua isi rumah. Keterbatasan kajian meliputi kesulitan dalam mendapatkan maklumat mengenai status ekonomi keluarga.

Untuk kajian akan datang, kajian seperti ini boleh dijalankan terhadap masyarakat atau negara lain seperti Malaysia. Penelitian lebih lanjut juga diperlukan untuk membangunkan model baru dan untuk mengenalpasti hubungan antara gaya hidup atau gaya kepimpinan isi rumah dan status ekonomi keluarga.

ACKNOWLEDGEMENTS

I thank God for all His blessings in giving me courage and strength to complete my study. It is understood that human beings cannot repay one another enough. Hence, it is better to request Almighty Allah to reward the person who did a favour and to give him the best.

A person cannot go through life without the help and guidance from others. One is invariably indebted, knowingly or unknowingly. These debts may be of physical, mental, psychological or intellectual in nature but they cannot be denied. To list all of them is not easy. To repay them even in words is beyond my capability. The present work is an imprint of many persons who have made significant contribution to its materialization.

The success of this thesis would not have been possible without various contributions and support to this work directly or indirectly, and I would like to convey my special appreciation to those who made it possible. I wish to express my deep sense of appreciation and gratitude towards my committee chairman and supervisor, ProfessorDr.Laily Haji Paim for her valuable patient, guidance and supervision of this dissertation. Your morality, constant support and encouragement have helped me to press on until the research written and completed. I learned and experienced a lot in doing a good research.

I am grateful to my advisory committee members, ProfessorDr.TurimanSuandi, andAssociate ProfessorDr.Mumtazah Othman for their recommendations and

guidance that lead this thesis to successful completion. Please accept my heartiest gratitude, you all have been sources of help, encouragement, and valuable advice to me, I am also grateful for your valuable suggestions and guidance during this study, without which the completion of my research would not have been possible.

I am thankful to all staff of UPM, especially those of the Faculty of Human Ecology who contributed to my learning processes, especially Professor Dr.Laily Haji Paim, Deanof the Faculty of Human Ecology.

Words are not enough to express my gratitude to my family for their patience and perseverance during my absence and for keeping me warm even when out of the country. I owe a lot to my father and my mother for accepting inconveniences of my absence during my study. They have been a constant source of encouragement. Finally I am especially grateful to my dear wife for patience for taking care of our children during my study, and my dearest brothers Mahmmoud and Mohsen, and also Mr Haj Abbas Shahidi.

I am deeply indebted to many individuals who have assisted me to perform the research and finalize this thesis by providing scientific, technical, administrative and moral support. I would like to offer my sincere gratitude to previous Chancellor of Payame Noor UniversitySirjan, Iran. Special thanks to Professor Dr. Mohammad Ali Karimi, Associate Prof, Dr Hamid Taboli, and Mr. Darya Baygi, staff of Payame Noor University Sirjanand all friends who helped me.

MEHDI YADOLLAHI

APPROVAL

I certified that an Examination Committee has met on 2 August 2011 to conduct the final examination of Mehdi Yadollahi on his Doctor of Philosophy thesis entitled “Relationships between Management Functions and Family Economic Status among Kerman Households in Iran” in accordance with Universiti Pertanian Malaysia Act 1980 and Universiti Putra Malaysia (Higher Degree) Regulations 1981. The committee recommends that the candidate be awarded the Doctor Philosophy.

Members of the Examination Committee are as follows:

Mansor Abu Talib, PhD

Associate Professor
Faculty of Human Ecology
Universiti Putra Malaysia
(Chairman)

Sharifah Azizah Haron, PhD

Associate Professor
Faculty of Human Ecology
Universiti Putra Malaysia
(Internal examiner)

Samsinar Md. Sidin, PhD

Professor
Graduate School of Management
Universiti Putra Malaysia
(Internal examiner)

Maurice MacDonald, PhD

Professor
College of Human Science
Lowa State University
(External Examiner)

SHAMSUDDIN SULAIMAN, PhD

Professor and deputy Dean
School of Graduate Studies
Universiti Putra Malaysia
Date: 2/ August 2011

This thesis submitted to the Senate of Universiti Putra Malaysia and has been accepted as fulfilment of the requirement for the degree of Doctor of Philosophy. The members of the Supervisory Committee are as follows:

Laily Haji Paim, PhD

Professor
Faculty of Human Ecology
Universiti Putra Malaysia
(Chairman)

Turiman BinSuandi, PhD

Professor
Faculty of Education
Universiti Putra Malaysia
(Member)

Mumtazah Othman, PhD

Associate Professor
Faculty of Human Ecology
Universiti Putra Malaysia
(Member)

HASANAH MOHD GHAZALI, PhD

Professor / Dean
