DEDICATION

This thesis is dedicated to:

My late mum, Allahyarhamah Che Yah, who had been my source of motivation and inspiration throughout my life. She left this world on Ramadhan 1430 before I can show her this work.

My husband, Ahmad Shaidi, and my three children, Aini Munirah, Aqil Hadif and Aqif Nukman who were all born throughout the period of my studies.

Abstract of thesis presented to the Senate of Universiti Putra Malaysia in fulfillment of the requirement for the degree of Doctor of Philosophy

TAX PLANNING AMONG COMPANIES IN MALAYSIA IN AN E-COMMERCE ENVIRONMENT

By

MORNI HAYATI BT JAAFAR SIDIK

July 2010

Chairman: Abu Sofian bin Yaacob, Ph.D.

Faculty: Graduate School of Management

E-commerce poses new way of doing business and provide new opportunities for companies to broaden their markets. E-commerce transactions, however, have raised several tax problems. One of them is the ambiguities surrounding the concept of permanent establishment. These ambiguities, on the other hand, may be used by e-commerce companies to reduce tax burden through tax planning. The purpose of this study is to examine the tax planning from PE interpretation in e-commerce environment in the Malaysian context.

This study employed two types of data collection methods. The first method is the quantitative data collection through questionnaire survey. Nine hundred and fifty questionnaires were sent to the selected respondents using both postal and electronic mail (e-mail). Out of 950 copies distributed, 107 questionnaires were received from the respondents. The second method involved collecting qualitative

data through in-depth interviews. The key personnel from four e-commerce companies were interviewed to gain further insights on their tax planning.

The results of this study showed that 95 percent of the respondents are tax planning adopters. The statistical analyses revealed that although the respondents adopt tax planning in e-commerce environment, they do not depend on the use of tax consultants, organizational characteristics and innovation factors.

The study also showed that there is no relationship between website address and tax planning adoption. Apart from that, there was no clear relationship between tax planning adoption and tax planning perceptions. The findings suggest that even though the companies adopt tax planning, it does not mean that they perceive tax planning to be important.

In summary, the findings suggest that tax issues might not be the main consideration when a company in Malaysia plans their website. There are other issues that are more important than tax issues such as legal and securities issues. This implies that the tax authorities in Malaysia may have ample time to study their tax policy in e-commerce environment. At the same time, CEOs and managers of the e-commerce companies should ensure they are equipped with tax knowledge in order to avoid any unnecessary tax liabilities.

Abstrak tesis yang dikemukakan kepada Senat Universiti Putra Malaysia sebagai memenuhi keperluan untuk ijazah Doktor Falsafah

**PELAN PERCUKAIAN SYARIKAT-SYARIKAT DI MALAYSIA DALAM
PERSEKITARAN E-DAGANG**

Oleh

MORNI HAYATI BT JAAFAR SIDIK

Julai 2010

Pengerusi: Abu Sofian bin Yaacob, Ph.D.

Fakulti: Sekolah Pengajian Siswazah Pengurusan

E-dagang merupakan cara baru untuk mengendalikan perniagaan dan memberi peluang kepada peniaga untuk mengembangkan pasaran mereka. Transaksi e-dagang bagaimanapun telah menimbulkan beberapa masalah percukaian. Salah satu daripada masalah tersebut adalah keraguan terhadap konsep “*permanent establishment*” (PE). Keraguan tersebut bagaimanapun boleh digunakan oleh syarikat e-dagang untuk mengurangkan bebanan cukai mereka melalui pelan percukaian. Tujuan penyelidikan ini adalah untuk mengkaji pelan percukaian daripada interpretasi PE di dalam suasana e-dagang dari konteks Malaysia.

Kajian ini menggunakan dua kaedah untuk mengumpul data. Kaedah pertama adalah mengumpul data kuantitatif dengan menggunakan borang kajiselidik. Sembilan ratus lima puluh borang kajiselidik (950) telah dihantar kepada responden yang terpilih secara pos dan elektronik (emel). Daripada jumlah tersebut, 107 borang kajiselidik telah diterima daripada responden. Kaedah kedua

ialah mengumpul data kualitatif melalui temubual secara mendalam. Pegawai utama daripada empat syarikat e-dagang telah ditemubual untuk mengetahui dengan lebih lanjut tentang pelan percukaian mereka.

Hasil kajian menunjukkan 95 peratus daripada respondent adalah pengguna pelan percukaian. Kajian statistik mendapati walaupun responden menggunakan pelan percukaian di dalam suasana e-dagang, ianya tidak bergantung kepada penggunaan pakar percukaian, sifat organisasi dan faktor inovasi.

Kajian ini juga mendapati tidak ada perhubungan di antara alamat laman web dan penggunaan pelan percukaian. Selain itu, tiada perhubungan di antara penggunaan pelan percukaian dan persepsi terhadap penggunaan pelan percukaian. Hasil kajian mengesorkan walaupun syarikat menggunakan pelan percukaian, ini tidak bererti mereka merasakan pelan percukaian sebagai sesuatu yang penting.

Secara ringkasnya, hasil kajian menyarankan bahawa isu cukai bukan merupakan perkara utama yang diambilkira oleh syarikat di Malaysia dalam membina laman web mereka. Isu lain yang diambilkira adalah seperti perundangan dan keselamatan. Ini bererti pihak berkuasa percukaian di Malaysia mempunyai ruang masa yang mencukupi untuk mengkaji polisi percukaian di dalam suasana e-dagang. Dalam masa yang sama, pengarah syarikat e-dagang mesti memastikan

mereka mempunyai ilmu percukaian untuk mengelakkan syarikat mereka daripada membayar liabiliti cukai yang tidak sepatutnya.

ACKNOWLEDGEMENTS

This thesis is the result of an arduous journey and a number of people have helped me along the way. Without them, this thesis would never have been completed.

Foremost, I would like to express my sincere gratitude to my supervisor Dr. Abu Sofian Yaacob for the continuous support of my PhD study and research, for his patience, motivation and enthusiasm since the beginning of the study.

Besides my supervisor, I would like to thank the rest of my thesis committee member, Prof. Dr. Fatimah Mohamed Arshad and Prof. Dr. Hajah Mustafa Mohd Hanefah for their encouragement and insightful comments. They took time off from their busy schedule to provide feedback on my thesis draft. I will always appreciate their effort.

I would also like to thank my fellow PhD buddies in UPM, Dr. Michelle Phang Mee Soung (Deakin University) who constantly motivates me to finish up this journey, Dr. Nahariah Jaafar (MMU), my colleagues in UTAR, for the stimulating discussions on research, Mr Yap Ching Seng, Mr Lee Teck Heang and Ms Angeline Yap. In particular, I am also indebted to the management in UTAR for giving the flexibility to pursue my study and also my colleagues in FAM UTAR, Puan Rahizah Rahim, Puan Junainah and Cik Fitriya, who keeps on reminding me to get a “Dr.” title.

Special gratitude goes to Dr Alias Radam (UPM) for helping me in statistical analysis and Dr Mastura Salleh for taking intense academic interest in the early stage of this study as well as providing valuable suggestions that improved the quality of this study.

I would like to express my heartiest thanks to my sisters and brothers for their kindness and affection, and for their constant encouragement to motivate me. My special appreciations are due to my niece, Amalina Ismail for editing the thesis, despite her busy schedule in entertaining her two active boys and also my nephew, Afzal for distributing the questionnaires.

Last but not the least, my special appreciation goes to my husband, Ahmad Shaidi Sahamin and my late mum, Allahyarhamah Che Yah who have helped me to concentrate on completing this thesis by taking care of the kids and supported mentally throughout the course of this work.

I certify that an Examination Committee met on July 2010 to conduct the final examination of Morni Hayati bt Jaafar Sidik on her Doctor of Philosophy thesis entitled "Tax Planning among companies in Malaysia in an e-commerce environment" in accordance with Universities and University Colleges Act 1971 and the Constitution of the Universiti Putra Malaysia [P.U(A) 106] 15 March 1998. The Committee recommends that the student be awarded the degree of Doctor of Philosophy.

Members of the Thesis Examination Committee were as follows:

Foong Soon Yau Ph.D.,

Professor
Graduate School of Management
Universiti Putra Malaysia
(Chairman)

J. Hesseldine, Ph.D.

Professor
Nottingham University Business School
Jubilee Campus
Wollaton Road
Nottingham NF8 1BB
