INTEGRATION OF GEOGRAPHICAL INFORMATION SYSTEM AND MULTI CRITERIA EVALUATION FOR IDENTIFICATION OF SUITABLE URBAN SCHOOL SITES

ZUBAIDAH BINTI BUKHARI

ITMA 2010 9
DEDICATION

Dedicated to my husband, kids, mom, sisters and brothers
Abstract of thesis presented to the Senate of Universiti Putra Malaysia in fulfilment of the requirement for the degree of Master of Science

INTEGRATION OF GEOGRAPHICAL INFORMATION SYSTEM AND MULTI CRITERIA EVALUATION FOR IDENTIFICATION OF SUITABLE URBAN SCHOOL SITES

By

ZUBAIDAH BINTI BUKHARI

NOVEMBER 2010

Chairman : Associate Professor Ahmad Rodzi Mahmud, PhD
Faculty : Institute of Advanced Technology

Schools which are located in a strategic, healthy and safe area play an important role in improving students’ performance and excellence. To ensure both success and long-term sustainability of the school planning, the finding of suitable sites for school is important and challenging. This study delves into a systematic site selection process to establish a new primary public school. It was carried out through the use of Geographic Information System (GIS) and multi criteria evaluation model (MCE). Decision makers’ evaluation and community opinions have been used for developing a set of school siting criteria and school planning data model which were used to design a number of potential sites by using the spatial analysis model. Mukim Batu which is located in the Federal Territory of Kuala Lumpur (WPKL) had been selected as the study area. The demography analysis identified 18.1% of the study area is in rapid growth while the safety analysis identified 17.3% of the area is in a safe zone. Constraint analysis identified 5% of the study area is suitable for school development. Weighted Linear Combination (WLC) technique had been used to combine the 3 analyses namely demographic, safety and constraint analysis to identify 6
potential sites. The accessibility analysis was used to further analyze the potential sites by using community opinions. The potential sites were compared with the field validation data and it was found to be reliable. This study has improved the school planning guideline and has brought a new approach for school site selections which combine the decision makers and community needs in the school site selection on the decision making process.
INTEGRASI SISTEM MAKLUMAT GEOGRAFI DAN MODEL PENILAIAN PELBAGAI KRITERIA UNTUK MENGENALPASTI KESESUAIAN TAPAK SEKOLAH DI BANDAR

Oleh

ZUBAIDAH BINTI BUKHARI

Pengerusi : Profesor Madya Ahmad Rodzi Mahmud, PhD
Fakulti : Institut Teknologi Maju

Sekolah yang terletak di dalam kawasan yang strategik, sihat dan selamat memainkan peranan yang penting di dalam meningkatkan prestasi kecemerlangan murid-murid. Proses pembinaan sekolah merupakan tugas yang penting dan mencabar kerana pelbagai faktor perlu diambil kira sebelum pembinaan sekolah dimulakan. Kajian ini menyiasat mengenai proses pemilihan tapak yang sesuai bagi pembinaan sekolah yang lebih sistematik. Sistem Maklumat Geografi (GIS) dan Model Penilaian Pelbagai Kriteria (MCE) telah digunakan bagi menjalankan kajian ini. Satu set kriteria dan model data sekolah telah dihasilkan dengan mengambil kira pendapat daripada pembuat keputusan dan komuniti di mana ia telah berjaya menghasilkan senarai tapak sekolah yang berpotensi menggunakan model analisis geospatial. Mukim Batu yang terletak di Wilayah Persekutuan Kuala Lumpur (WPKL) telah dipilih sebagai kawasan kajian. Analisis demografi yang dilaksanakan telah mengenalpasti bahawa 18.1% dari keseluruhan kawasan kajian berada di kawasan yang mempunyai penduduk yang padat, manakala analisis sekolah selamat mendapati 17.3% dari keseluruhan kawasan kajian berada di zon...
ACKNOWLEDGEMENTS

Praise be to Allah, the Most Gracious, the Most Merciful, who had blessed me His mercy to accomplish this research smoothly.

Special thanks to a wise and kind Assoc. Prof. Dr. Ahmad Rodzi Mahmud, my advisor as well as supervisor, who has always guided me through my hard times in UPM, followed my study progress and thoroughly reading my writing. His dedication has greatly contributed to the smoothness of my research. Many thanks as well to my co-supervisors, a knowledgeable and expertise Assoc. Prof. Dr. Noordin Ahmad for his tolerance in advising, guiding and encouraging me until the thesis is well completed; and a friendly Assoc. Prof. Dr. Abdul Rashid Mohd. Shariff, for his suggestions and opinions that has led to the refinement of this thesis.

I am very grateful to EPRD, JPWPKL, JUPEM, MyGDI, DBKL for providing the fund, data and technologies. I am thankful to Dr. Amir Salleh, the director of EPRD, Dr. Azwan Aziz, the Head of Research & Design at EPRD, Dr. Habibah Abdul Rahim, Dr. Mohd Suhaimi Mohamed Ali, En Yusof Ibrahim and En Halim for their guidance and assistance.

My appreciation to other lecturers in Geomatics Engineering, Puan Wan Azizun Wan Adnan, Dr. Helmi Zulhaidi Mohd. Shafri, Dr. Taher Buyong who have enriched my knowledge in GIS. I would like to express my special thanks to all of my friends especially Nik Norasma Che Ya, Rohana Abdul Rahman, Fakhri Adnan, Ruzinoor Che Mat, Abdul Halim Hamzah and my colleagues for their moral support during my study.
I would like to extend my heartfelt thanks to my husband Mohamad Redzuan Khalib and my kids, Muhammad Amirul Firdaus, Nur Amira Diyana and Muhammad Syahmi Ashraff and also to my mother Aishah Muslimin, my brothers and my sisters for their love, understanding and encouragement to complete this study.
I certify that a Thesis Examination Committee met on 3 November 2010 to conduct the final examination of Zubaidah binti Bukhari on her thesis entitled “Integration of Geographical Information System and Multi Criteria Evaluation for Identification of Suitable Urban School Sites” in accordance with the Universities and University College Act 1971 and the Constitution of the Universiti Putra Malaysia [P.U.(A) 106] 15 March 1998. The committee recommends that the student be awarded the Master of Science.

Members of the Thesis Examination Committee were as follows:

**Hussain Hamid, PhD**  
Associate Professor  
Faculty of Engineering  
Universiti Putra Malaysia  
(Chairman)

**Saeid Pirasteh, PhD**  
Senior Research Fellow  
Institute of Advanced Technology  
Universiti Putra Malaysia  
(Internal Examiner)

**Helmi Zulhaidi Mohd. Shafri, PhD**  
Lecturer  
Faculty of Engineering  
Universiti Putra Malaysia  
(Internal Examiner)

**Ruslan Rainis, PhD**  
Professor  
School of Humanities  
Universiti Sains Malaysia  
(External Examiner)

Date: 22 February 2011
This thesis was submitted to the Senate of Universiti Putra Malaysia and has been accepted as fulfilment of the requirement for the degree of Master of Science. The members of the Supervisory Committee were as follows:

Ahmad Rodzi Mahmud, PhD
Associate Professor
Faculty of Engineering
Universiti Putra Malaysia
(Chairman)

Abdul Rashid Mohamed Shariff, PhD
Associate Professor
Faculty of Engineering
Universiti Putra Malaysia
(Member)

Noordin Ahmad, PhD
Associate Professor
Faculty of Engineering
Universiti Putra Malaysia
(Member)

DECLARATION

I declare that the thesis is my original work except for quotations and citations which have been duly acknowledged. I also declare that it has not been previously and is not concurrently submitted for any other degree at Universiti Putra Malaysia or other institutions.
