

Project: YOU GOT IT

Area: Job Matching

THE project is an undergraduate incubation programme where students will be placed under contractual employment (internship) every semester break and paid between RM1000 - RM1300 per month so that by the end of their studies, they will have accumulated a full year's of job experience.

The pilot programme will take place either at Universiti Putra Malaysia (UPM) or UTM and take in initially five students, one from each faculty.

The aim is, by adding value to their resumes, to increase the employment rate amongst undergraduates and reduce their unemployment period after graduation.

"Students need practical training in order to be better graduates.

And Malaysia needs a future workforce that is better prepared to contribute to the economy." — Nazirul Amin Thalha
