ICT READINESS IN TEACHING AND LEARNING AS PERCEIVED BY TECHNICAL AND VOCATIONAL EDUCATION TEACHERS IN MALAYSIA

By

ABU-obaideh Saleem Saleh Alazzam

January 2013

Chair: Professor Ab Rahim bin Bakar, PhD

Faculty: Educational Studies

The purpose of this study was to determine the information and communication technology (ICT) readiness and the use of ICT in teaching by technical and vocational teachers in Malaysia. The questionnaire was developed by the researcher and administered to 329 technical and vocational teachers who were teaching engineering subjects in Malaysian technical and vocational schools. Descriptive and inferential statistic analyses were used to analyze the data such as t-test, ANOVA, MANOVA, Chi-Square, Pearson Product Moment Correlation, and Multiple Discriminant Analysis (MDA).
The findings of this study indicated that the majority of the teachers in terms of their readiness had moderate level about ICT knowledge, moderate skillful level about ICT skills, and possessed positive attitudes towards ICT use in teaching. The findings indicated that there were no statistically significant differences of gender, type of training, administrative support and ICT availability with ICT knowledge level. However, there were statistically significant differences of age, years of teaching experience, and level of qualification with ICT knowledge level. While the findings also indicated that there were statistically significant differences of gender, age, years of teaching experience, and type of training with ICT skills level. In addition to that, there were no statistically significant differences on the level of qualification, administrative support, and ICT availability with ICT skills level. Moreover, there was no significant difference between both gender and administrative support with teachers’ attitudes. While, there were no significant differences between attitudes and teachers’ age, years of teaching experience, level of qualification, type of training and ICT availability.

The results of MANOVA indicated that there was significant relationship between demographic characteristics by gender only with teachers’ overall readiness (ICT knowledge, ICT skills, and attitudes). However, there were no significant relationship between teachers’ education background and overall support with teachers’ overall readiness. For level of using ICT in teaching
among the teachers, the majority of teachers indicated to be using ICT very frequently with heavy users’ level. Moreover, only one variable, that is, level of qualification appeared to have some influence on the teachers’ ICT use in teaching. Only those with a bachelor degree tend to use ICT more frequently than the others. The results of correlations measured were significantly positive between ICT use and ICT skills as well as ICT use and attitudes. The correlation also was positive between ICT skills and attitudes. The results of Multiple Discriminant Analysis (MDA) found that the variables ICT skills and attitudes were the best predictors among other variables in ICT use.

KESEDIAN TEKNOLOGI MAKLUMAT DAN KOMUNIKASI (TMK) DALAM PENGAJARAN DAN PEMBELAJARAN BERDASARKAN ANGGAPAN GURU-GURU PENDIDIKAN TEKNIKAL DAN VOKASIONAL DI MALAYSIA

Oleh

ABU-OBAIDEH SALEEM SALEH ALAZZAM

Januari 2013

Pengerusi: Professor Ab Rahim bin Bakar, PhD

Fakulti: Pengajian Pendidikan

Tujuan kajian ini adalah untuk mengenalpasti kesediaan teknologi maklumat dan komunikasi (TMK) dan penggunaan TMK dalam pengajaran oleh guru-guru teknikal dan vokasional di Malaysia. Borang soal selidik telah dibangunkan oleh penyelidik dan diberikan kepada 329 guru-guru teknikal dan vokasional yang mengajar mata pelajaran kejuruteraan di sekolah-sekolah teknikal dan vokasional di Malaysia. Analisis statistik deskriptif dan inferensial telah digunakan untuk menganalisis data ujian-T, analisis varians (ANOVA), analisis varians multivariat (MANOVA), Chi-square, Korelasi Product Moment Pearson, dan Analisis Diskriminasi Berganda (MDA).
Dapatan kajian ini menunjukkan bahawa majoriti guru-guru mempunyai tahap yang sederhana dari segi kesediaan mereka tentang pengetahuan TMK, tahap sederhana tentang kemahiran TMK, dan mempunyai sikap yang positif terhadap penggunaan TMK dalam pengajaran. Dapatan kajian menunjukkan bahawa tiada perbezaan yang signifikan dari segi jantina, jenis latihan, sokongan pentadbiran dan ketersediaan TMK dengan tahap pengetahuan TMK. Namun, terdapat perbezaan yang signifikan dari segi umur, pengalaman mengajar, dan tahap kelayakan dengan tahap pengetahuan TMK. Dapatan kajian turut menunjukkan bahawa terdapat perbezaan yang signifikan dari segi jantina, umur, pengalaman mengajar, dan jenis latihan dengan tahap kemahiran TMK. Di samping itu, tiada perbezaan yang signifikan pada tahap kelayakan, sokongan pentadbiran, dan ketersediaan TMK dengan tahap kemahiran TMK. Selain itu, tiada perbezaan yang signifikan juga di antara kedua-dua jantina dan sokongan pentadbiran dengan sikap guru. Sementara itu, tiada perbezaan yang signifikan di antara sikap dan umur guru, pengalaman mengajar, tahap kelayakan, jenis latihan dan ketersediaan TMK.

Keputusan analisis MANOVA menunjukkan bahawa terdapat hubungan yang signifikan di antara ciri-ciri demografi mengikut jantina dengan tahap kesediaan guru secara keseluruhan (pengetahuan TMK, kemahiran TMK, dan sikap). Walau bagaimanapun, tiada hubungan yang signifikan di antara latar belakang pendidikan dan sokongan keseluruhan dengan kesediaan guru-guru.
ACKNOWLEDGEMENTS

Terri Guillemets once said that a wayfarer is to meet more angels on a winding journey than on a straight one. Thus, this successful journey in completion of this thesis, though challenging, was made possible through the blessings of Allah Almighty and also invaluable contribution of a number of people who are very dear to me.

It is my fortune to gratefully acknowledge the support of some special individuals. My deepest appreciation goes to both of my parents as well as brothers and sisters, with their unconditional love, whose days and nights are spent on relentless prayers and endless words of encouragement. I would like to profess my gratitude to Professor Dr. Ab Rahim Bin Bakar, my supervisor, who has always been a source of guidance with his immense knowledge and experience. Apart from my supervisor, I would also like to thank the rest of my thesis committee members: Associate Professor Dr. Ramlah Bt Hamzah, Dr Soaib Bin Asmiran, for their encouragement and insightful comments.

At this moment of accomplishment, I would like to pay homage to my friends: Mohmad Jameel Alazzam, Ahmad Abid Alfatah Alazzam, Ibrahim Ghadi, Muhd Khaizer Bin Omar, Ady Hameme, Nur Faradilla Piee @ Shafie and Omar Akesh as they deserve special mention here for their constant support, motivation and help.

In this light of gratitude, it feels incomplete without a special mention of a very dear friend of mine who is no longer here with me, physically, Shareef.
Barahmeh. In his eternal absence, even though he is not physically with me when I was in the middle of all the difficulties, in any times of darkness I encountered in the development of my thesis, I know in my heart that he is with me in spirit.

Finally I would like to express my deep gratitude to the person who is very important for me (Noor Hafiza Binti Nor Azmi) for her never-ending moral support and encouragement.

Interdependence is certainly more valuable than independence. Thank you doesn’t seem sufficient but it is said with appreciation and respect to all of those who supported me in any respect during the completion of the thesis.
I certify that a Thesis Examination Committee has met on 7 January to conduct the final examination of Abu-obaideh Saleem Saleh Alazzam on his degree thesis entitled “Ict Readiness in Teaching and Learning as Perceived by Technical and Vocational Education Teachers in Malaysia” in accordance with the Universities and University College Act 1971 and the Constitution of the Universiti Putra Malaysia [P.U.(A) 106] 15 March 1998. The committee recommends that the student be awarded the Degree of Doctor of Philosophy.

Members of the Thesis Examination Committee were as follows:

**Abdullah Mat Rashid, PhD**  
Senior Lecturer  
Faculty of Educational Studies  
Universiti Putra Malaysia  
(Chairman)

**Mokhtar Hj. Nawawi 1, PhD**  
Senior Lecturer  
Faculty of Educational Studies  
Universiti Putra Malaysia  
(Internal Examiner)

**Rosnaini Mahmud 2, PhD**  
Senior Lecturer  
Faculty of Educational Studies  
Universiti Putra Malaysia  
(Internal Examiner)

**Joe W. Kotrlik, PhD**  
Professor  
University of Louisiana State  
United States of America  
(External Examiner)

## CHAPTER 1 INTRODUCTION

1.1 Background of the Study  
1.1.1 Information and Communications Technology in Today’s World  
1.1.2 Education System in Malaysia  
1.1.3 Technical and Vocational Education in Malaysia  
1.1.4 Benefits and Challenges of ICT Use  
1.2 Statement of the Problem  
1.3 Objectives of the Study  
1.4 Research Questions  
1.5 Significance of the Study  
1.6 Limitations of the Study  
1.7 Scope of the Study  
1.8 Definitions of Terms  
1.8.1 Technical and Vocational Education (TVE)  
1.8.2 Information and Communications Technology (ICT)  
1.8.3 ICT Use  
1.8.4 Teachers’ ICT Readiness  
1.8.4.1 ICT Knowledge  
1.8.4.2 ICT Skills  
1.8.4.3 Attitudes  
1.8.5 Demographic Characteristics  
1.8.6 Education Background  
1.8.7 Overall Support
1.8.8 Technical and Vocational Teachers 29
1.9 Summary 29

2 REVIEW OF LITERATURE
2.1 Introduction 30
2.2 ICT Use in Teaching 31
2.3 Teachers’ Readiness 34
2.4 Theories and models being used in this study 37
2.4.1 Adaptive Control of Thought (ACT) 37
2.4.2 Implication of Adaptive Control of Thought (ACT) on this Study 38
2.4.3 Technology Acceptance Model (TAM) 39
2.4.4 Implication of Technology Acceptance Model (TAM) 40
2.5 Gender and ICT Use 41
2.6 Teachers’ Age and their Level of Qualification with ICT Use 46
2.7 Teachers’ Training and ICT Use 48
2.8 Years of Teaching Experience and ICT Use 54
2.9 ICTs Availability and ICT Use 56
2.10 Administration Support and ICT Use 60
2.11 Teachers’ ICT Knowledge and Skills 62
2.12 Teachers’ Attitudes toward ICT Use 67
2.13 Factors that may Predict the Use of ICT in Teaching 73
2.14 New ICT Tools in Classroom Teaching 75
2.15 Conceptual Framework 86
2.16 Summary 89

3 RESEARCH METHODOLOGY
3.1 Introduction 90
3.2 Design of the Study 91
3.3 Location of the Study 92
3.4 Population 92
3.5 Sample Size 93
3.6 Sampling Procedures 96
3.7 Instrumentation 97
3.8 Measuring the Levels of ICT Use in Teaching 101
3.9 Measuring the Levels of Readiness (ICT Knowledge, ICT Skills and Attitudes) 102
3.10 Validity and Reliability of Instrument 105
3.11 Pilot Testing 106
3.11.1 Discrimination Index 108
3.11.2 Difficulty Index 111
3.11.3 Reliability 112
4 RESEARCH FINDINGS

4.1 Introduction

4.2 Demographic Characteristics of the Respondents

4.3 Education Background of the Respondents

4.4 Overall Support

4.5 Research Objective 1a: To determine the level of ICT knowledge among technical and vocational teachers in Malaysia

4.6 Research Objective 1b: To determine if there are any significant differences in technical and vocational teachers' ICT knowledge attributed to their gender, age, teaching experience, level of qualification, type of training, administrative support, and ICT availability

4.7 Research Objective 2a: To determine the level of ICT skills among technical and vocational teachers in Malaysia

4.8 Research Objective 2b: To determine if there are any significant differences in technical and vocational teachers' ICT skills attributed to their gender, age, teaching experience, level of qualification, type of training, administrative support, and ICT availability

4.9 Research Objective 3a: To determine the level of attitudes towards ICT use in teaching among technical and vocational teachers in Malaysia

4.10 Research Objective 3b: To determine if there are any significant differences in technical and vocational teachers' attitudes towards ICT use attributed to their gender, age, teaching experience, level of qualification, type of training, administrative support, and ICT availability

4.11 Research Objective 4: To determine the relation between technical and vocational teachers' demographic characteristics, education background, overall support, and readiness

4.12 Research Objective 5: To determine to what extent of ICT use in the teaching among technical and vocational teachers in Malaysia

4.13 Research Objective 6: To determine are any relationship between technical and vocational teachers' readiness and their ICT use in teaching
4.14 Research Objective 7: To determine the factors that may predict ICT use in teaching by technical and vocational teachers

4.15 Summary

5 CONCLUSION, DISCUSSION AND RECOMMENDATION

5.1 Introduction
5.2 Discussion of Key Findings
5.3 Findings of Demographic Characteristic, Education Background, and Overall Support
5.4 Research Objective 1a: To determine the level of ICT knowledge among technical and vocational teachers in Malaysia
5.5 Research Objective 1b: To determine if there are any significant differences in technical and vocational teachers' ICT knowledge attributed to their gender, age, teaching experience, level of qualification, type of training, administrative support, and ICT availability
5.6 Research Objective 2a: To determine the level of ICT skills among technical and vocational teachers in Malaysia
5.7 Research Objective 2b: To determine if there are any significant differences in technical and vocational teachers' ICT skills attributed to their gender, age, teaching experience, level of qualification, type of training, administrative support, and ICT availability
5.8 Research Objective 3a: To determine the level of attitudes toward ICT use in teaching among technical and vocational teachers in Malaysia
5.9 Research Objective 3b: To determine if there are any significant differences in technical and vocational teachers' attitudes towards ICT use attributed to their gender, age, teaching experience, level of qualification, type of training, administrative support, and ICT availability
5.10 Research Objective 4: To determine the relation between technical and vocational teachers’ demographic characteristics, education background, overall support, and readiness
5.11 Research Objective 5: To determine to what extent of ICT use in teaching by technical and vocational Teachers in Malaysia
5.12 Research Objective 6: To determine are any relationship between technical and vocational
5.13 Research Objective 7: To determine the factors that may predict ICT use in teaching by technical and vocational teachers in Malaysia

5.14 Conclusions

5.15 Implications and Recommendations for Future Research
