My beloved brother, Milad

This is just a small token of my love & affection and underlying gratitude & appreciation for all you have done for me.

Thank you and God bless you always
Abstract of thesis presented to the Senate of Universiti Putra Malaysia in fulfilment of the requirement for the Degree of Doctor of Philosophy

A CROSS-DISCIPLINARY EXPLORATION OF METADISCOURSE IN EXPERIMENTAL RESEARCH ARTICLES

By

MOHSEN KHEDRI

August 2014

Chairperson: Prof. Chan Swee Heng, PhD
Faculty: Modern Languages and Communication

In today’s academic arena, the research article is one of the extensively accomplished communicative genres among members of a particular disciplinary community. Through such a seminal genre, members are able to disseminate their own new knowledge and secure acceptance from addressees. A generic analysis of the research article can enfold issues of different varieties; among them are linguistic features. A crucial part of linguistic features of the research article is shaped through metadiscourse. Metadiscourse is a facet of language which provides a linkage between texts and disciplinary epistemologies, assisting to delineate the rhetorical context by demonstrating some of the readers’ anticipations and expectations. The key principle behind metadiscourse deployment is the view of writing as socially engaging; particularly, it designates writers’ styles whereby they bring themselves into discourses to pronounce their standpoints and commitments to readers. Being so, the current research aimed at exploring the status of metadiscourse in experimental research articles written by scholars belonging to the four disciplines of Applied Linguistics, Psychology, Environmental Engineering and Chemistry. Simply put, this study sought for i) detecting the extent to which metadiscourse markers are incorporated in experimental research articles in the four disciplines; ii) investigating the types of metadiscourse mapped in each rhetorical section (IMRD) of research articles cross-disciplinarily; and iii) finding out different communicative functions fulfilled by the different groups of writers through metadiscourse usage in each of the rhetorical sections (IMRD).
To this end, adopting Hyland’s (2005) Interpersonal Model of Metadiscourse and taking a mixed-method of quantitative and qualitative analysis, forty experimental research articles (10 per discipline) sourced from internationally well-known refereed journals were analyzed. Results revealed evident variations across the disciplinary communities regarding both frequency and functional analysis. One salient finding concerns the dominant presence of metadiscourse in both corpora of the soft science disciplines, especially in AL writings. This shows that the style adopted is one that reflects a more writer-responsible style. In contrast, their peers in the fields of EE and Che preferred a reader-responsible approach which imposes on readers to mentally create less obvious linkages between different layers of given information to obtain the message.

In terms of writers’ communicative functions of metadiscourse deployment in different rhetorical sections of research articles, more marked cross-disciplinary variations were found. For example, the psychologists, in results and discussion sections, resorted to hedges to reintroduce research purposively/descriptively and to state limitation of their works. These communicative functions were totally absent from the other disciplines.

Based on the findings, it can be deduced that metadiscourse use is directly concerned with socio-rhetorical disciplinary norms and conventions established in each particular communities. Results of such an exploratory study could be used by members, especially novice writers in the academic communities concerned to i) make good use of metadiscoursal resources in their writings; ii) broadcast their knowledge through research articles effectively; and iii) familiarize themselves with their respective communities, thus enabling them to gain acceptance from their disciplinary established gatekeepers. The examination of the metadiscourse emphasizes the need to create a reader-based prose which will enhance writing quality that could result in greater opportunities for publication. Much more research could be conducted to seek out the cross-disciplinary differences in rhetorical use in metadiscourse.
Abstrak tesis yang dikemukakan kepada Senat Universiti Putra Malaysia sebagai memenuhi keperluan untuk Ijazah Doktor Falsafah

KAJIAN EKSPLORATORI SILANG DISIPLIN MENGENAI METAWACANA DALAM ARTIKEL PENYELIDIKAN AKADEMIK

Oleh

MOHSEN KHEDRI

Ogos 2014

Pengerusi:  Prof. Chan Swee Heng, PhD
Fakulti:  Bahasa Moden dan Komunikasi

Dalam arena akademik hari ini, artikel penyelidikan merupakan salah satu genre komunikasi yang secara giat berjaya dilaksanakan dalam kalangan ahli komuniti sesuatu bidang disiplin. Melalui genre tersebut, seperti seminar, ahli dapat menyebarkan ilmu pengetahuan baru mereka dan perkara ini dapat menyakinkan sasaran penerima. Analisis generik sesuatu artikel penyelidikan dapat menyelesaikan pelbagai isu; antaranya ialah ciri linguistik. Bahagian penting ciri linguistik bagi sesuatu artikel penyelidikan dapat dibentuk melalui metawacana. Metawacana merupakan faset bahasa yang menyediakan pautan antara teks dan epistemologi disiplin, membantu untuk menggariskan konteks retorikal dengan mendemonstrasikan sebahagian antisipasi dan ekspektasi pembaca. Prinsip penting di sebalik metawacana ialah aspek penulisan sebagai keterlibatan secara sosial, terutamanya, sebagai penanda stайл penulis yang mereka bawa ke dalam wacana bagi menyatakan pegangan dan komitmen mereka kepada sasaran pembaca. Atas sebab tersebut, penyelidikan semasa ini bertujuan untuk mengeksplorasi status metawacana dalam artikel penyelidikan eksperimental yang ditulis oleh empat disiplin, iaitu, Linguistik Gunaan, Psikologi, Kejuruteraan dan Kimia Persekitaran. Dengan kata lain, kajian ini dijalankan adalah untuk i) mengenal pasti sejauh mana penanda metawacana digabungkan dalam empat disiplin artikel penyelidikan eksperimental tersebut; ii) menyelidiki jenis metawacana yang dibincangkan dalam setiap bahagian retorikal (IMRD) artikel penyelidikan silang disiplin; dan iii) meneliti pelbagai tujuan komunikasi yang dipenuhi oleh pelbagai kumpulan penulis melalui penggunaan metawacana dalam setiap bahagian retorikal (IMRD).
Bagi mencapai tujuan kajian ini, dengan mengadopsi Model Interpersonal Metawacana Hyland (2005) dan menggunakan analisis kaedah campuran kuantitatif dan kualitatif, empat puluh artikel eksperimental (10 bagi setiap disiplin) yang diperoleh dari jurnal wasit antarabangsa telah dianalisis. Hasil dapatan menunjukkan terdapatnya bukti variasi silang disiplin mengenai kedua-dua frekuensi dan analisis fungsional. Salah satu dapatan yang menonjol ialah melibatkan kewujudan metawacana yang dominan dalam kedua-dua korpora disiplin ilmu sains ringan, terutama dalam penulisan AL. Hal ini menunjukkan bahawa stail yang diguna pakai merupakan sesuatu yang menggambarkan stail yang lebih bersifat tanggungjawab penulis. Sebaliknya, rakan sebaya mereka dalam bidang EE dan Che menyukai pendekatan yang bersifat tanggungjawab pembaca yang memaksa supaya pembaca menggunakan mental bagi mewujudkan pautan yang kurang jelas antara pelbagai paras maklumat yang diberikan bagi memperoleh mesej.

Dari segi tujuan komunikatif penulis tentang unsur metawacana dalam artikel penyelidikan bahagian retorikal yang berbeza, didapati lebih penanda variasi silang disiplin. Sebagai contoh, ahli psikologi, dalam bahagian hasil dapatan dan bahagian perbincangan, menggunakan hedge bagi memperkenalkan semula tujuan kajian/secara deskriptif dan menyatakan limitasi hasil kerja mereka. Tujuan komunikatif tersebut langsung tidak wujud dari disiplin yang lain.

Berdasarkan hasil dapatan, dapatlah dibuat kesimpulan bahawa penggunaan metawacana adalah secara langsung berkaitan dengan norma dan konvensyen sosio-retorikal disiplin yang wujud dalam setiap komuniti. Hasil dapatan dari kajian eksploratori tersebut harus digunakan oleh ahli, terutamanya penulis novis dalam komuniti akademik yang berkaitan bagi i) menggunakan sumber metawacana yang berguna dalam penulisan mereka; ii) mewar-warkan pengetahuan mereka melalui artikel penyelidikan secara efektif; dan iii) membiasakan diri mereka dengan komuniti yang berkenaan, seterusnya membolehkan mereka memperoleh penerimaan daripada penyaring maklumat mantap mereka. Penelitian terhadap metawacana menekankan keperluan untuk mewujudkan prosa yang berorientasikan pembaca yang akan meningkatkan kualiti penulisan yang menyebabkan peluang dan ruang yang lebih bagi tujuan penerbitan. Lebih banyak penyelidikan harus dijalankan bagi mendapatkan perbezaan silang disiplin dalam penggunaan retorikal dalam metawacana.
ACKNOWLEDGEMENTS

Completing this thesis is the pinnacle of my academic achievement and I would not have been able to accomplish it without the help and support of a few individuals. Firstly, I am greatly indebted to Universiti Putra Malaysia for providing me with the International Graduate Research Fellowship (IGRF) which paved me the way to do my research contentedly. This was made possible through the support of The Lord, my supervisor, Prof. Dr. Chan Swee Heng, the Deputy Dean of the Faculty of Modern Languages and Communication, Assoc. Prof. Dr. Ain Nadzimah Abdullah and the Head of the English Department of the Faculty of Modern Languages and Communication, Dr. Sabariah Rashid. Without their supportive attempts, completing my thesis would have been a bigger challenge for me.

Secondly, this thesis would not have come to fruition if not for the expert guidance of my three esteemed and dedicated supervisory committee members, Prof. Dr. Chan Swee Heng (chairman), Assoc. Prof. Dr. Ain Nadzimah Abdullah and Dr. Helen Tan (members). Their insightful comments have helped me to improve and polish my thesis.

To each of you, thank you from the bottom of my heart.

I would also like to extend my deepest appreciation and gratitude to my beloved family members, my dad, Jahanbakhsh Khedri, my mum, Farideh Pourazizian and my siblings, Minoo and Milad Khedri. I frankly owe to each of you for your encouragement and understanding throughout the course of my study. I know you may not fully understand what difficult days and nights I spent by being far away from you to my PhD dream come true. Your perpetual prayers and support are highly appreciated.

Above all and most importantly, my utmost gratitude and thanks to the Almighty God for the many graces and blessings He has bestowed on me and my family. Thank you for journeying with me and making it possible for me to achieve this important milestone of my life. May this humble piece of work bring glory and praise to your Holly Name.
I certify that a Thesis Examination Committee has met on 14 August 2014 to conduct the final examination of Mohsen Khedri on his thesis entitled "A Cross-Disciplinary Exploration of Metadiscourse in Experimental Research Articles" in accordance with the Universities and University Colleges Act 1971 and the Constitution of the Universiti Putra Malaysia [P.U.(A) 106] 15 March 1998. The Committee recommends that the student be awarded the Doctor of Philosophy.

Members of the Thesis Examination Committee were as follows:

Shamala a/p Paramasivam, PhD
Associate Professor
Faculty of Modern Language and Communication
Universiti Putra Malaysia
(Chairman)

Jayakaran a/l A.P.Mukundan, PhD
Professor
Faculty of Educational Studies
Universiti Putra Malaysia
(Internal Examiner)

Jason Lim Miin Hwa, PhD
Associate Professor
Universiti Malaysia Sabah
Malaysia
(External Examiner)

Guangwei Hu, PhD
Associate Professor
Nanyang Technological University
Singapore
(External Examiner)
