# Contents

**Preface** vi

**1 Introduction to Groundwater** 1

1.1 General 1
1.2 Vertical Distribution of Groundwater 3
1.3 Groundwater in the Hydrologic Cycle 3
1.4 Movement of Groundwater 5
1.5 Groundwater in Malaysia 5
1.6 Groundwater and Geotechnical Engineering 8

**2 Principles of Groundwater Flow** 10

2.1 Principles of Groundwater Flow 10
2.2 Generalisation of Darcy's Law 13
2.3 Validity of Darcy's Law 14
2.4 Coefficient of Permeability 15
2.5 Types of Aquifers 26
2.6 Storage Coefficient and Specific Storage 28
2.7 Transmissivity 30
2.8 Leakance, Retardation Coefficient, and Leakage Factor 32
2.9 Critical Hydraulic Gradient 33
2.10 Capillarity 34

**3 Groundwater and Well Hydraulics** 35

3.1 Introduction 35
3.2 Well Hydraulics 36
3.3 Unsteady Radial Flow to a Well in Confined Aquifer 40
3.4 Recharging or Injection Wells 44

3.5 Well Flow Near Boundaries: Theory of Images 45
3.6 Design Criteria of Wells 50
3.7 Well Fields 53
3.8 Well Fields Design 54

**4 Well Construction 58**

4.1 Classification of Wells 58
4.2 Open Wells 59
4.3 Tubewells 65
4.4 Construction of Tubewells 66
4.5 Types of Tubewells 68
4.6 Design of Well Screen 72
4.7 Gravel Pack Design 73
4.8 Designing Length and Size of the Screen 77
4.9 Required Investigation and Well Construction 79
4.10 Well Specifications 80

**5 Flow Net Technique 82**

5.1 Introduction 82
5.2 Theoretical Background of the Flow Net 83
5.3 Properties of Flow Net 84
5.4 Trial and Error or Graphical Method 85
5.5 Procedure for Construction of a Flow Net 87
5.6 Flow Net in Isotropic Soil 88
5.7 Flow Net in Anisotropic Soil 92
5.8 Seepage Through an Earth Dam on an Impervious Base 95
5.9 SEEP/W Model Characteristic and Application 99

**6 Subsurface Drainage 104**

6.1 Introduction 104
6.2 Subsurface Drainage System 105
6.3 Materials Used for Subsurface Drains 105
6.4 Layout of Subsurface Drains 108
6.5 Outlets of Subsurface Drainage 110
6.6 Depth and Spacing of Subsurface Drains 112
6.7 Drainage Coefficient (D.C.) 114

6.8 Proposed Steps for Design of Subsurface Drainage System 115
6.9 Drainage by Vertical Wells 116

**7 Groundwater in Geoenvironment 118**

7.1 Sources of Groundwater Pollution 118
7.2 Saline Water Intrusion 121
7.3 Upconing of Saline Water 122
7.4 Protection Against Intrusion 124
7.5 Control of Groundwater Contamination Using Biological Treatment 125
7.6 Contaminant Transport in Groundwater 128

**8 Application of Numerical Solutions for Some Selected Cases in Groundwater 130**

8.1 General 130
8.2 Numerical Solution of Groundwater Flow Equation 130
8.3 Numerical Solution of Two Dimensional Laplace Equation 141

**9 Role of Groundwater in Geotechnical Engineering and the Geomorphological Processes 153**

9.1 Landslides and Slope Stability 153
9.2 Groundwater and Dam 159
9.3 Inflow of Groundwater into an Excavation 173
9.4 Inflow of Groundwater into a Tunnel 176
9.5 Groundwater and Geomorphology 178
