

CONTENTS

Preface	ix
■ CHAPTER 1– INTRODUCTION	1
1.0 Overview	1
1.1 Historical Perspective	4
1.2 IBS Versus Conventional Approach	6
1.3 Common Structural Forms	7
1.4 Materials	10
1.5 Design Loads	11
1.6 Conclusion	13
■ CHAPTER 2– FEATURES AND ATTRIBUTES	14
2.0 Introduction	14
2.1 Attributes	14
2.2 Open Systems	16
2.3 Prefabrication	16
2.4 Tolerances	19
2.5 Connections and Joints	23
2.6 Stability and Progressive Collapse	27
2.7 Indoor Environment	32
2.8 Fire Resistance	33
2.9 Transportation and Site Constraints	36
2.10 Conclusion	37
■ CHAPTER 3 – MODULAR CO-ORDINATION AND STANDARDISATION	38
3.0 Introduction	38
3.1 Basic Principles	38
3.2 Standardisation of Elements	41
3.3 Joint Widths	42
3.4 Erection and Assembly	43
3.5 Conclusion	44
■ CHAPTER 4 – INDUSTRIALISED BUILDING SYSTEMS	45
4.0 Introduction	45
4.1 Categorisation	45
4.2 Skeletal Frame System	46

4.3	Load Bearing Wall System	49
4.4	Modular Cell System	52
4.5	Concrete Interlocking Hollow Block Building System	52
4.6	Partial Industrialised Building Systems	55
4.7	Conclusion	66
■ CHAPTER 5 – FLOORING SYSTEMS		67
5.0	Introduction	67
5.1	Structural Behaviour	67
5.2	Solid Slab Planks	70
5.3	Design Loads	73
5.4	Design Philosophy	74
5.5	Design of Precast Slab Panels	78
5.6	Design of Flooring Planks	80
5.7	Interfacial Shear in Composite Planks	92
5.8	Design of Longitudinal Joints	93
5.9	Connection with Supporting Wall/Beam	96
5.10	Conclusion	101
■ CHAPTER 6 – ROOFING SYSTEMS		102
6.0	Introduction	102
6.1	Types, Materials and Design Aspects	102
6.2	Truss Roofs	104
6.3	Ferrocement Roofs	108
6.4	Stability	110
6.5	Conclusion	112
■ CHAPTER 7 – FRAME SYSTEMS		113
7.0	Introduction	113
7.1	Structural Forms	114
7.2	Analysis Procedure	116
7.3	Structural Behaviour	123
7.4	Components and Their Designs	126
7.5	Joints and Connections	127
7.6	Static Friction	131
7.7	Materials	141
7.8	Assembly and Erection	142
7.9	Facades	144
7.10	Progressive Collapse	145
7.11	Conclusion	145

■ CHAPTER 8 - SOLID PANEL SYSTEM	146
8.0 Introduction	146
8.1 Load sharing in Panels	147
8.2 Design of Panels	150
8.3 Joints Between Panels	153
8.4 Connections at Intersections of Panels	155
8.5 Panel–Floor Connections	159
8.6 Panel–Foundation Connections	160
8.7 Progressive Collapse	162
8.8 Materials and Panels	163
8.9 Conclusion	164
■ CHAPTER 9 - SANDWICH PANEL SYSTEM	165
9.0 Introduction	165
9.1 Materials and Components	165
9.2 Design Considerations	168
9.3 Design of of Sandwich Panel Walls	169
9.4 Shear Connectors	174
9.5 Design of Vertical Connections	176
9.6 Horizontal Sandwich Panel–Floor Connection	180
9.7 Horizontal Sandwich Panel–Base Connection	182
9.8 Sandwich Panels with Openings	183
9.9 Assembly and Erection	185
9.10 Conclusion	186
■ CHAPTER 10 - BOX SYSTEMS	187
10.0 Introduction	187
10.1 Structural Behaviour	188
10.2 Design Considerations	191
10.3 Design of Cells	192
10.4 Connections	193
10.5 Stability	196
10.6 Conclusion	197
■ CHAPTER 11 - INTERLOCKING BLOCKS	198
11.0 Introduction	198
11.1 Types and Geometry	199
11.2 Structural Action	201
11.3 Studies on Blocks and Prisms	202
11.4 Putra Block Panels	204

11.5	Use of Stiffeners	206
11.6	Design Considerations	207
11.7	Materials	217
11.8	Conclusion	218
■	CHAPTER 12 – COMPOSITE CONSTRUCTION	219
12.0	Introduction	219
12.1	Composite Elements	219
12.2	Concrete–Concrete Composite Systems	221
12.3	Steel–Concrete Composite Systems	224
12.4	Composite Columns	226
12.5	Prestressed Composites	227
12.6	Conclusion	228
■	CHAPTER 13 – SPECIAL COMPONENTS	229
13.0	Introduction	229
13.1	Staircases	229
13.2	Infil Panels	233
13.3	Lift Shafts	234
13.4	Partition Walls	236
13.5	Foundations	238
13.6	Conclusion	241
■	CHAPTER 14 – FUTURE DEVELOPMENTS	242
14.0	Introduction	242
14.1	Computer Integrated Construction	242
14.2	Intelligent Buildings	246
14.3	Conclusion	251
	References	253
	Index	257
