Abstract of thesis presented to the Senate of Universiti Putra Malaysia in fulfilment
of the requirement for the degree of Master of Science

**VISITORS' PERCEPTIONS OF THE IMPACT OF SPATIAL
ORGANIZATION ON WAYFINDING QUALITIES IN KUALA LUMPUR
ISLAMIC ARTS MUSEUM**

By

MINA BAKHTIARI

August 2012

Chairman: Associate professor Ar. Azizah Salim Syed Salim, PhD

Faculty: Design and Architecture

Museums are not only architectural spaces contain artefacts. Visitors come to museums for both entertainment and education and in other word: 'edutainment'. Thus, every visitor has his/her own perception and interpretation of artefacts and it is the museum organization duty to enhance this perception as desirable as possible.

Since perceiving the educational dimension of museums will be eased when people are moving and routing through the galleries and exhibitions, the way in which people are routed through the exhibitions can affect the overall perception.

Since the plan configuration of Islamic Arts Museum Malaysia is listed as plans with less simplicity, so the wayfinding problem can occur in the museum and following this problem, visitors are not able to perceive the educational message of the museum through the exhibits. However according to the literature there is a number of factors that are likely to affect wayfinding inside an environment and this study is an effort to find the effect of these factors on visitors' wayfinding inside the museums beside the effect of floor plan configuration.

Method of inquiry applied in this study is survey; and the flow of the research starts with conducting a confirmation test in order to confirm the observed problems of

Kuala Lumpur Islamic Arts Museum regarding wayfinding issue. Once the survey was chosen as the method, the survey questionnaire was designed in order to gather the data in the form of categorical questions; therefore, the method to analyze the data was chosen to be Chi-square analysis.

The significant results of this study argue that between ‘spatial characteristics’ and ‘visitors’ demographic characteristics’ this is the latter that affects wayfinding inside the museum through constructing visitors’ expectation and consequently the perceived quality of the museum.

Abstrak tesis yang dikemukakan kepada Senat Universiti Putra Malaysia
sebagai memenuhi keperluan untuk ijazah

**PELAWAT PANDANGAN KESAN DARI ORGANISASI SPATIAL ATAS
KUALITI PENCARIAN LALUAN DI KUALA LUMPUR ISLAMIC ARTS
MUSEUM**

Oleh

MINA BAKHTIARI

Pengerusi: Prof. Madya Ar. Azizah Salim Syed Salim, PhD

Fakulti: Rekabentuk dan Senibina

Muzium bukan hanya satu ruang senibina yang mengumpulkan artifak. Pengunjung datang ke muzium dengan dua tujuan iaitu untuk keseronokan dan juga pembelajaran. Setiap pengunjung mempunyai pandangan dan interpretasi yang berbeza dan pihak muzium hendaklah memenuhi kehendak pengunjung sebaik mungkin.

Dimensi elemen pembelajaran akan lebih mudah jika pengunjung bergerak dan melalui ruang galeri dan pameran. Kaedah pergerakan dan hala tuju pengunjung juga member kesan terhadap persepsi pengunjung.

Muzium Kesenian Islam Malaysia yang kurang kesederhanaan menyebabkan masalah pencarian laluan berlaku, dan pengunjung tidak dapat maklumat pembelajaran sebaik mungkin. Walau bagaimanapun, terdapat faktor yang mempengaruhi pencarian laluan di dalam persekitaran dan kajian ini adalah bertujuan untuk mencari kesan factor-faktor ini ke atas pengunjung di dalam muzium selain daripada kesan ke atas konfigurasi susunatur pelan lantai.

Kajian ini mengaplikasikan kaedah tinjauan dan kajian dimulakan dengan mengadakan pra-ujian untuk mengesahkan masalah yang diperhatikan di Muzium

Kesenian Islam Kuala Lumpur dan fokus kajian/masalah serta soalan kajian disahkan. Soalan kaji selidik dibuat dalam bentuk soalan berkategori dan analisis *Chi-square* digunakan untuk menganalisis data.

Keputusan yang signifikan dalam kajian ini menghuraikan bahawa ruang dan demografik memberi kesan terhadap pencarian laluan di dalam muzium melalui jangkaan pengunjung dan kualiti muzium yang diterima.

ACKNOWLEDGEMENTS

In the Name of Allah

Undoubtedly finishing a work like this thesis could not be made possible without the staunch support of those who have helped me. These supports have been such great and helpful that I would really like to appreciate them here. To those who I have forgotten to mention, thank them first of all. There are, however, a few people I remember in particular.

It is my pleasure to acknowledge and thanks all persons who have influenced me in the flow of this research. First, I wish to express my gratitude to my principal supervisor, Associate Professor Dr. Ar. Azizah Salim Syed Salim, who helped and advised me to choose the best topic and provided me with a wide range of facilities and references to reach a satisfactory conclusion and stood with and guided me in my difficulties and problems.

My significant acknowledgement is also due to Dr Suhardi Maulan, Deputy Dean of Faculty of Design and Architecture, Universiti Putra Malaysia, and Dr Sabzali Musa Kahn from Universiti Malaya who are members of the supervisory committee, for their time, continued critical suggestions, and endless help. I am really thankful that despite all of their responsibilities, they always found time to supervise me with their endless guidance and kindness.

To conduct a research like this, a post graduate student must work in a stimulating and friendly atmosphere, and enjoy the support in the form of facilities and tools.

This was one of my great opportunities that I had all of the above and it has been made possible by the Faculty of Design and Architecture led by Prof. Dr. Rahinah Ibrahim, Assoc. Prof. Dr. Norsidah Ujang, Dr. Raja Ahmad Azmeer Raja Ahmad Effendi, and LAr. Dr. Suhardi Maulan; and Assoc. Prof. Ar. Meor Mohammad Fared Meor Razali who heads the Department of Architecture.

I am also indebted to Prof. Dr. Hajah Rahinah Ibrahim, Encik Mohd Nasir Baharuddin, and Dr Kamariah Dola for their valuable comments on this research in the field of research methodology, arts, and wayfinding issue respectively.

I would like to thank all the past and present staff members of the Faculty of Design and Architecture and the Department of Architecture for their help and cooperation.

I have enjoyed very much the cooperation and a very friendly and supporting manner of all my Malay, international, and Iranian friends in the Faculty of Design and Architecture and the Department of Architecture, during my study as an international post graduate student in UPM.

Last, and by no means the least, I would like to express my special gratitude to my spouse, Shahab Nehzati for his patience and cooperation, my parents, Giti Charkhian and Parviz Bakhtiari, my beloved siblings, Maryam and Majid Bakhtiari and my niece, Kimia Khomamizadeh, and my family in law, for supporting me through the years of study far from my country and their full encouragement and patience. Thank you very much my beloved family! I am sure it has meant more to me than I can even imagine.

I certify that a thesis examination committee has met on..... 2012 to conduct the final examination of Mina Bakhtiari on her thesis entitled ‘Impact of Spatial Organization towards Wayfinding Qualities in Kuala Lumpur Islamic Arts Museum Through Visitors’ Perception’ in accordance with the Universities College Act 1971 and the constitution of the Universiti Putra Malaysia [P.U.(A) 106] 15 March 1998. The committee recommends that the student be awarded the Master of Science. Members of the Thesis Examination Committee were as follow:

Zulkarnain Zainal, PhD

Professor and Deputy Dean

School of graduate Studies

Universiti Putra Malaysia

Date:

This thesis was submitted to the Senate of Universiti Putra Malaysia and has been accepted as fulfilment of the requirement for the degree of Masters of Science. The members of the Supervisory were as follows:
