ABSTRACT

Abstract of thesis presented to the Senate of Universiti Putra Malaysia in fulfillment of the requirement for the degree of Doctor of Philosophy

RELATIONSHIPS AMONG LEARNING ORGANIZATIONS, CAPITAL FACTORS, AND ORGANIZATIONAL PERFORMANCE MEDIATED BY INTRAPRENEURSHIP IN IRANIAN INSURANCE COMPANIES

By

FARHAD ALIPOUR

June 2012

Chairman:  Associate Professor Khairuddin Bin Idris, PhD
Faculty:  Educational Studies

There is empirical evidence to the importance of learning organizations and capital factors in organizational performance improvement. However, the result of this area is inconsistent and not much attention has been given to these factors in developing countries such as Iran. In addition, almost no effort has been made to examine the mediating effect of intrapreneurship in the relationship among learning organization, human capital, social capital, physical capital, and organizational performance. Therefore, the current study aims to develop a comprehensive model of the antecedents of organizational performance in the presence of intrapreneurship as a mediating variable.

This study was done through a survey on 266 branches of Iranian insurance companies to predict the variables that affect organizational performance. In line with this objective, the SEM methodology was employed to present the best-fitted
model. The fit indices show an acceptable fit for the proposed model. Therefore, the model was able to explain how independent (exogenous) variables (learning organization, human capital, social capital, physical capital) lead to organizational performance and how intrapreneurship mediates the relationship between these variables and organizational performance.

Testing of the hypotheses was conducted using the correlation coefficient and Structural Equation Modeling (SEM). The overall findings show that there is a significant, linear, and positive relationship among learning organization, human capital, social capital, physical capital, intrapreneurship, and organizational performance. Also, the total effect ($\beta$) of these factors on organizational performance was .381, 307, 350, 250, and .242, respectively.

One of the most significant findings that emerged from this study is that intrapreneurship has partially mediated the relationship between learning organization and organizational performance and the relationship between social capital and organizational performance. Therefore, companies should strengthen intrapreneurship behaviors as an alternative to increase organizational performance. Based on the findings, to increase entrepreneurial behaviors, organizations should focus especially on learning organization characteristics and social capital dimensions.
Abstrak tesis yang dikiemukakan kepada Senat Universiti Putra Malaysia sebagai memenuhi keperluan untuk ijazah Doktor Falsafah

HUBUNGAN DALAM KALANGAN ORGANISASI PEMBELAJARAN, FAKTOR KAPITAL, DAN PRESTASI ORGANISASI DENGAN PENGANTARAAN KEUSAHAWANAN DALAMAN DI SYARIKAT INSURAN TERPILIH DI IRAN

Oleh
FARHAD ALIPOUR

Pengerusi: Profesor Madya Khairuddin Bin Idris, PhD
Fakulti: Pengajian Pendidikan

Terdapat beberapa bukti empirikal terhadap kepentingan pembelajaran organisasi dan modal faktor dalam peningkatan prestasi organisasi. Walau bagaimanapun, hasil daripada kajian dalam bidang ini tidak konsisten dan tidak banyak perhatian telah diberi kepada faktor ini di negara membangun seperti Iran. Di samping itu, hampir tiada usaha dibuat untuk menyiapkan kesan pengantaraan keusahawanan dalaman (intrapreneurship) dalam hubungan antara organisasi pembelajaran, modal insan, modal sosial, modal fizikal dan prestasi organisasi. Oleh itu, kajian ini bertujuan membangunkan satu model komprehensif penyumbang prestasi organisasi dalam kehadiran keusahawanan dalaman (intrapreneurship) sebagai pembolehubah pengantara.

Kajian ini menggunakan kaji selidik terhadap 266 cawangan syarikat insuran Iran untuk meramal pembolehubah yang mempengaruhi prestasi organisasi. Selaras v
dengan objektif ini, kaedah Structure Equation Modeling (SEM) telah digunakan untuk membentangkan model berpadan terbaik. Indeks berpadan menunjukkan bahawa kepadanan yang boleh diterima terhadap cadangan model. Oleh itu, model ini mampu menjelaskan bagaimana pembolehubah bebas (exogenous) (organisasi pembelajaran, modal insan, modal sosial, modal fizikal) mempengaruhi prestasi organisasi dan bagaimana keusahawanan dalaman (intrapreneurship) bertindak sebagai pengantara dalam hubungan antara pembolehubah dan prestasi organisasi.

Pengujian hipotesis telah dijalankan dengan menggunakan pekali korelasi dan Permodelan Persamaan Berstruktur (PPB). Hasil keseluruhan menunjukkan bahawa terdapat hubungan yang signifikan, linear dan positif antara organisasi pembelajaran, modal insan, modal sosial, modal fizikal, keusahawanan dalaman (intrapreneurship) dan prestasi organisasi. Juga, jumlah kesan (β) pembolehubah tersebut terhadap prestasi organisasi masing-masing adalah 0,381, 307, 350, 250, 0,242.

Salah satu penemuan yang paling penting yang muncul dari kajian ini adalah bahawa keusahawanan dalaman (intrapreneurship) telah mengantara sebahagian hubungan antara organisasi pembelajaran dan prestasi organisasi dan hubungan antara modal sosial dan prestasi organisasi. Oleh itu, syarikat perlu mengukuhkan tingkah laku keusahawanan dalaman (intrapreneurship) sebagai alternatif untuk meningkatkan prestasi organisasi. Berdasarkan dapatan kajian, untuk meningkatkan tingkah laku keusahawanan, organisasi perlu memberi tumpuan terutamanya pada ciri-ciri organisasi pembelajaran dan dimensi modal sosial.
ACKNOWLEDGEMENTS

First of all I am thankful to God who gave me faith, strength, and patience to study. I am profoundly appreciative to Associate Professor Dr. Khairuddin Bin Idris, chairman of the supervisory committee for his valuable support, insightful suggestions, and constructive criticism without which the completion of this investigation would not have been possible. It is a great pleasure to declare my special appreciation to Professor Dr. Jegak Anak Uli and Dr. Ismi Arif Bin Ismail, supervisory committee members, who generously read the manuscript and provided me with careful comments.

I am especially thankful to all the professors in the HRD department of UPM because they had guided and supported me as an international student.

I would like to thank all the managers and staff in Iran, Alborz and Asia insurance companies that helped me to collect my data.

I am indeed grateful to wife, Roohangiz Karimi. She has been always supportive of me through the many challenges and difficulties of completing for my doctoral studies. I also thank my son Ahmadreza and wonderful twin daughter, Maryam and Mitra for their continued love during this journey.
I certify that a Thesis Examination Committee has met on 01.06.2012 to conduct the final examination of Farhad Alipour on his Doctor of Philosophy thesis entitled “Relationships Among Learning Organizations, Capital Factors, And Organizational Performance Mediated By Intrapreneurship In Iranian Insurance Companies” in accordance with Universities and University Colleges Act 1971 and the Constitution of the Universiti Putra Malaysia [P.U.(A) 106] 15 March 1998. The committee recommends that the student be awarded the degree of Doctor of Philosophy.

Members of the Examination Committee were as follows:

**Shamsudin bin Ahmad, PhD**  
Lecturer  
Faculty of Educational Studies  
Universiti Putra Malaysia  
(Chairman)

**Turiman bin Suandi, PhD**  
Professor  
Faculty of Educational Studies  
Universiti Putra Malaysia
