A Memorial to a Memorable Event commemorates the aftermath of the Iranian Presidential Election of the previous year. The memorial is for events that followed the election without espousing any ideological, political stand or affiliation. The artefact seeks to evoke the emotions, sentiments and aspirations leading to the events and trailing after them.

The approach is steeped in symbolism and not limited to the monument alone as it also allows for experiential participation. Visitors are invited to walk through it right up to the heart of an inner sanctum for a fallen one during those events. Even if this was missed, the memorial would still be perceived as a sanctum in its entirety by the idyllic ambience created within by the stark, robust geometry and scale of the components. They further enhance the character of the space and the interplay of filtered celestial lighting.

Award: Joint 3rd Place. 8th International Student Competition: A Monument To A Memorable Event Organised By Commonwealth Association Of Architects.
