WOMEN'S PARTICIPATION IN AGRARIAN REFORM COMMUNITY PROJECT IN A FILIPINO BARANGAY

By

BADRIYA P. MAKOL

Thesis Submitted to the School of Graduate Studies, Universiti Putra Malaysia, in Fulfilment of the Requirements for the Degree of Doctor of Philosophy

August 2004
This study examined women’s participation in the Agrarian Reform Community (ARC) project in a Filipino barangay. Specifically, the study identified the different processes involved in establishing the ARC projects and examined the forms and extent of women’s participation in each process. It also analyzed the conditions that influenced their participation, and the benefits that they derived from their involvement in these projects. The policy implications of this study were also discussed.
This study utilized a qualitative-ethnographic approach. Various methods of data collection were used in the study. These included in-depth interviews, focus group discussions (FGD), key-informant interviews, and direct observations method.

The findings of the study revealed that two processes were involved in setting up the ARC projects. The first process was mobilization covering several phases, namely: social preparation, organizational building, capability building, and enterprise development. The second one was operationalization, comprising the planning, implementation and monitoring stages. Various activities were carried out in the mobilization and operationalization processes of the ARC projects.

The results of the study showed that women were involved in many different forms of participation in both processes. However, during the initial phase of mobilization, they played a rather limited role, since they were not involved in decision-making. A higher degree of participation was only noted between the organizational building phase and the capability-building phase during which they began to participate actively in planning and in decision-making. In the operationalization process, the women were given the authority to manage the ARC projects. As a result, they demonstrated a high extent of participation in all the activities, be they at the planning, implementation or monitoring stages.
Women's participation in the ARC projects was associated with several conditions. These were conditions that were associated with the women themselves, conditions that were associated with the projects, conditions that were associated with their leaders, and conditions that were associated with networking. Their participation in the ARC projects provided them with both material and non-material benefits.

The study concluded that the implementation of the ARC projects not only resulted in the creation of income-generating activities in the barangay, but also it facilitated women's participation in development efforts. Despite their limited resources, they showed greater motivation to take part in the projects. They had demonstrated that through a participatory form of development they could, by acting collectively, achieve self-reliance.
Abstrak tesis yang dikemukakan kepada Senat Universiti Putra Malaysia sebagai memenuhi keperluan untuk Ijazah Doktor Falsafah

PENGLIBATAN WANITA DI DALAM PROJEK KOMUNITI REFORMASI AGRARIA DI SEBUAH BARANGAY DI FILIPINA

Kajian ini telah menggunakan pendekatan kualitatif - etnografik. Pelbagai kaedah pengumpulan data telah digunakan untuk kajian ini, termasuk temubual mendalam, perbincangan secara berkumpulan, temubual informan utama, dan pemerhatian secara langsung.

Hasil kajian menunjukan bahawa, pembentukan projek-projek ARC melibatkan dua proses. Proses pertama ialah proses mobilisasi yang merangkumi beberapa fasa, iaitu persediaan sosial, pembangunan organisasi, pembangunan kemampuan, dan pembangunan perusahaan. Proses kedua ialah proses pengoperasian mengandungi tiga peringkat iaitu, perancangan, implimentasi dan peringkat pemantauan. Pelbagai aktiviti telah dijalankan semasa proses mobilisasi dan pengoperasian projek ARC.

Hasil kajian telah menunjukkan bahawa wanita telah melibatkan diri dalam pelbagai bentuk penglibatan di dalam kedua-dua proses. Walau bagaimanapun, semasa peringkat awal mobilisasi, mereka memainkan peranan yang agak terhad, kerana mereka tidak terlibat di dalam membuat keputusan. Darjah penglibatan yang lebih tinggi hanya dapat dilihat antara fasa pembangunan organisasi dan fasa pembangunan kemampuan, dalam mana mereka mula terlibat secara aktif di dalam
merancang dan membuat keputusan. Semasa proses pengoperasian, wanita yang terlibat telah diberi autoriti untuk menguruskan projek-projek ARC. Oleh hal yang demikian, mereka telah menunjukkan tahap penglibatan yang tinggi di dalam semua aktiviti, iaitu aktiviti membuat perancangan, membuat keputusan, dan pemantauan.

Penglibatan di kalangan wanita di dalam projek-projek ARC berkait dengan beberapa situasi iaitu situasi yang berkaitan dengan kaum wanita itu sendiri, situasi yang berkaitan dengan projek, situasi yang berkaitan dengan ketua mereka, dan situasi yang dikaitkan dengan jalinan kerja. Penglibatan mereka di dalam projek ARC telah memberi faedah baik dari segi material dan bukan material.

Kajian ini menyimpulkan bahawa implementasi projek-projek ARC, tidak sahaja telah mewujudkan activiti-activiti pendapatan, tetapi ia juga telah memberi ruang yang mendatangkan kepada kaum wanita untuk melibatkan diri dalam usaha-usaha pembangunan. Walaupun berhadapan dengan masalah sumber yang terhad, mereka telah menunjukkan motivasi yang tinggi di dalam mengambil bahagian dalam projek-projek yang dijalankan. Mereka telah menunjukkan potensi untuk mengambil tindakan secara kolektif untuk berdikari, melalui pembangunan berturut-serta.
ACKNOWLEDGEMENTS

First and foremost, I would like to express my deepest gratitude to "ALMIGHTY ALLAH" for His blessings and guidance, without which, this manuscript would not have been completed.

I am indebted to a number of people who have contributed tremendously to the completion of this work.

I would like to express my sincere appreciation and gratitude to DR. ZAHID EMBY, the Chairman of my supervisory committee, for his scholarly and persistent guidance from the initial conceptualization of the research proposal until it was finally formed into a complete manuscript.

I am deeply indebted to ASSOC. PROF. DR. ABD. HALIN HAMID for sharing his expertise and wisdom, and for providing me guidance and encouragement.

I would like to record my gratitude also to DR. ASNARULKHADI ABU SAMAH for generously sharing his critical knowledge on Community Development and qualitative methodology. I am very thankful for his valuable assistance on qualitative data analysis.
My sincere thanks also go to PROF. AMINAH AHMAD for sharing her knowledge of research methodology with me, and for reviewing the manuscript patiently, which helped in the refinement of this work.

Special thanks are also due to my parents, mother-in-law and siblings for their love, encouragement and support. I have to express my gratitude also to Dr. Pute Rahimah Makol (my elder sister), to my brother-in-law, Dr. Teng M. Abdul, and to my nephew, Shaharil for providing me a home in Malaysia, and for giving me unwavering support through the years.

Sincere appreciation is also due to Dr. Richard Mason of USM, Vilayhak Somsouliving from Laos, Gloria Oanes, Syuhaily Osman, Norashikin Mahmud, Johanim Johari, Rabaah Shahidah Aziz, Jomra, Josephine, Jihan for their moral and friendly concern.

Special thanks are due to Ashna Ontok, Djhoanna Sugaran and Nasrodin Mustapha for sharing their computer expertise with me, and for their friendship and encouragement.

I am happy to acknowledge Engr. Taib S. Abdulgani, Reena Obillo, for helping me in securing the necessary data from Department of Agrarian Reform Central Office. I would also like to acknowledge the assistance provided by the Provincial Agrarian Reform Office at
Tagum City and the Municipal Agrarian Reform Office at Panabo District during the fieldwork.

I am most thankful to the Department of Social Sciences and Development Staff particularly Kak Khamsiah and Nina for all their support, Dr. Rozumah Baharuddin, formerly Deputy Dean for Research and staff, Dr. Jariah Masud and staff, the Graduate School Office especially to Kak Faridah, En. Roslan, Pn.. Maizatul, Pn. Jamaliah, Pn. Suhaila for the necessary cooperation provided to me during the entire period of the study.

Last but not the least, I would like to thank the Malaysian Technical Cooperation Program for the scholarship grant that helped me tremendously in completing my postgraduate program. I am also grateful to the Department of Agrarian Reform, through its Director Nasser Musali, for the support and encouragement.

My most important acknowledgement goes to my husband, Dr. Elias Jan Stark, for supporting me in every way throughout my work.
I certify that an Examination Committee met on 27th August 2004 to conduct the final examination of Badriya P. Makol on her Doctor of Philosophy thesis entitled “Women’s Participation in Agrarian Reform Community Project in a Filipino Barangay” in accordance with Universiti Pertanian Malaysia (Higher Degree) Act 1980 and Universiti Pertanian Malaysia (Higher Degree) Regulations 1981. The Committee recommends that the candidate be awarded the relevant degree. Members of the Examination Committee are as follows:

**LAILY PAIM, Ph.D.**
Associate Professor
Faculty of Human Ecology
Universiti Putra Malaysia
(Chairman)

**HJ. AZIMI HAMZAH, Ph.D.**
Professor
Institute for Community and Peace Studies
Universiti Putra Malaysia
(Member)

**HJ. MA’ROF BIN REDZUAN, Ph.D.**
Lecturer
Faculty of Human Ecology
Universiti Putra Malaysia
(Member)

**DATO’ YAACOB HARUN, Ph.D.**
Professor
Chair for Malay Studies
Victoria University of Wellington
New Zealand
(Independent Examiner)

---

**ZAKARIAH ABD. RASHID, Ph.D.**
Professor/Deputy Dean
School of Graduate Studies
Universiti Putra Malaysia

Date: 20 DEC. 2004
This thesis submitted to the Senate of Universiti Putra Malaysia and has been accepted as fulfillment of the requirement for the degree of Doctor of Philosophy. The members of the Supervisory Committee are as follows:

**ZAHID EMBY, Ph.D.**  
Lecturer  
Faculty of Human Ecology  
Universiti Putra Malaysia  
(Chairman)

**ABD. HALIN HAMID, Ph.D.**  
Associate Professor  
Faculty of Human Ecology  
Universiti Putra Malaysia  
(Member)

**ASNARULKHADI ABU SAMAH, Ph.D.**  
Lecturer  
Faculty of Human Ecology  
Universiti Putra Malaysia  
(Member)

**AMINAH AHMAD, Ph.D.**  
Professor  
Faculty of Educational Studies  
Universiti Putra Malaysia  
(Member)

CHAPTER 1

INTRODUCTION

1.1 Background of the Study

Development in the 1950s and 1960s was seen as an economic phenomenon in which rapid gains in overall and per capita Gross National Product (GNP) growth would “trickle down” to the masses in the form of jobs, new economic opportunities, or better conditions for wider distribution of economic and social benefits of growth. During this period, a large number of Third World nations did achieve the United Nations growth targets. However, the levels of living of the masses remained for the most part unchanged. Todaro (1982) pointed out the experience in the 1950s and 1960s signaled something was wrong with the narrow definition of development. A redefinition of development concept among less-developed countries was then deemed necessary.

It is, therefore, apparent that the focus of development should be the welfare of human beings. Women constitute a significant portion of the human population and their participation in development has been increasingly appreciated. This participation is best captured in
Nelson's (1979) statements:

"Women's participation in development is obviously not a simple one; it relates to a complete range of socio-economic activities. Women are not only users of basic economic services, bearers and socializers of children and keepers of the home, where they are underemployed or inefficient and overworked, they represent a productive potential, which is not being tapped. Women form half of the population and the development of a country cannot be realized if half of the people lagged behind".

Failure to include women in the development process runs counter to the true meaning of development and invariably hinders the process itself. Development programs which do not take into account the cooperation and participation of women may be slowed down and made less effective than they could have been had the aspects been considered.

The role of women in development has grown in importance and recognition. The various efforts initiated at the international arena since 1975 have become effective channels to popularize the notion of women's participation in the development process, and to increase the awareness on issues related to women in development among developing countries.

The awareness of women in development issues actually began when the United Nation's (UN) General Assembly declared 1975 as the International Women's Year with the theme: equality, development and peace. In line with this declaration, several world conferences on
women were held. The first conference was held in Mexico in 1975, and it was the first global effort to give recognition to women’s active participation in development of a nation as well as for family well-being. This was followed by a conference in Copenhagen in 1980 and in Nairobi in 1985. A series of conferences mostly hosted by non-governmental organizations resulted in free-flowing debates on various issues relating to women and led to the formation of networks and organizations advocating issues on women in development. In all the conferences, networking programs for women and the integration of women in development have been consistently recognized.

The integration of women in development has been consistently emphasized in the Philippines. This is illustrated by the formulation of the Medium-term Philippine Development Plan 1993-1998, which also included women in its priorities (Department of Agrarian Reform, 1993).

In the Philippines, there is a shift in viewing development as a mere economic issue taking into account the impact of this change on the social life of the people. Development interventions then should treat women not as mere beneficiaries, but actors of development. In this paradigm shift, women should assume an active role in determining the content and process of development. The Medium-Term Philippine Development Plan (MTPDP) envisions that by the end of
