

**A FRAMEWORK FOR MEASURING KNOWLEDGE TRANSFER PROCESS IN
E-LEARNING ENVIRONMENT**

By

SALFARINA BT ABDULLAH

**Thesis Submitted to the School of Graduate Studies, Universiti Putra Malaysia, in
Fulfilment of the Requirement for the Degree of Master of Science**

June 2006

DEDICATION

I want to dedicate this thesis to my dearest family, especially my beloved husband, Mr. Sazly Anuar and my dearest son, Iman Raziq and lovely daughter, Iman Nuryasmin for their support and love throughout my studies.

Abstract of thesis presented to the Senate of Universiti Putra Malaysia in
fulfilment of the requirement for the degree of Master of Science

**A FRAMEWORK FOR MEASURING KNOWLEDGE TRANSFER
PROCESS IN E-LEARNING ENVIRONMENT**

By

SALFARINA BT ABDULLAH

June 2006

Chairman: Associate Professor Haji Mohd Hasan bin Selamat

Faculty: Computer Science and Information Technology

Efficiently transferring knowledge has proven to be a difficult challenge as well as to get people to use the knowledge (Seidman and McCauley, 2005). And as a part of ensuring that the knowledge transfer process is effectively conducted, there is a strong needs to measure its effectiveness. Although research in this area has been conducted in many settings, unfortunately less attention has been paid to examine the process in the virtual environment (Sarker, 2003), including the E-Learning. This may be due to the fact that lack of research has been found so far, which addressed a formal or specific guideline (or framework) for measuring the effectiveness of knowledge transfer process in E-Learning. As stated by Tillquist and Rodgers (2002), the existing measures often appear confusing and may not provide a satisfactory description of the process's effectiveness. Looking at the huge influence that E-Learning brought to Knowledge Transfer Process has motivates the attempt for developing the effectiveness measurement framework for knowledge transfer process in E-Learning environment. This framework is inspired from the E-Faculty, chosen as the case of this

research. It is an E-Learning system developed by FSKTM, UPM as complement to the traditional classroom.

This attempt however, sets its main concentration on proposing the appropriate measurement attributes for three key factors towards effective knowledge transfer process, which are knowledge to be transferred, knowledge receiver and knowledge transfer medium. This research applied the survey method in order to validate the proposed framework. The data was later analyzed using statistical analysis. Five out of eight developed hypotheses were evidently supported while three others were not supported. Consisting of three key factors to effective knowledge transfer process, this framework also provides the recommended measurement attributes for each key factor.

Abstrak tesis yang dikemukakan kepada Senat Universiti Putra Malaysia
sebagai memenuhi keperluan untuk ijazah Master Sains

**RANGKA KERJA PENGUKURAN UNTUK MENGUKUR PROSES
PEMINDAHAN ILMU PENGETAHUAN DI DALAM
PERSEKITARAN E-PEMBELAJARAN**

Oleh

SALFARINA BT ABDULLAH

Pengerusi: Profesor Madya Haji Mohd Hasan bin Selamat

Fakulti: Sains Komputer dan Teknologi Maklumat

Pemindahan ilmu pengetahuan yang efisien telah terbukti sebagai suatu cabaran sukar selain daripada membuatkan individu-individu menggunakan ilmu pengetahuan (Seidman and McCauley, 2005). Dan sebagai sebahagian daripada membuktikan bahawa proses pemindahan ilmu pengetahuan dilakukan secara efektif, maka perlunya pengukuran ke atas keberkesanan proses tersebut. Walaupun kajian di dalam bidang ini telah dilaksanakan di dalam pelbagai keadaan, malangnya hanya sedikit perhatian yang diberikan terhadap proses di dalam persekitaran maya (Sarker, 2003), termasuklah e-pembelajaran. Ini mungkin disebabkan kurangnya kajian yang ditemui sehingga kini yang menyediakan suatu panduan (atau rangka kerja pengukuran) yang formal atau khusus bagi mengukur keberkesanan proses pemindahan ilmu pengetahuan di dalam e-pembelajaran. Seperti yang pernah dikatakan oleh Tillquist dan Rodgers (2002), pengukuran yang ada kerap kali mengelirukan dan berkemungkinan tidak dapat memberi gambaran yang memuaskan mengenai keberkesanan sesuatu proses.

Melihat kepada pengaruh besar yang dibawa oleh e-pembelajaran terhadap proses pemindahan ilmu pengetahuan, telah memberi motivasi dalam usaha untuk membangunkan suatu rangka kerja pengukuran keberkesanan bagi proses pemindahan ilmu pengetahuan di dalam persekitaran e-pembelajaran. Rangka kerja ini diilhamkan daripada E-Fakulti, yang dipilih sebagai kes kajian. Ia merupakan sebuah sistem e-pembelajaran yang dibangunkan oleh FSKTM, UPM sebagai pelengkap kepada kelas tradisional.

Walau bagaimanapun, usaha ini lebih memfokuskan kepada mencadangkan atribut-atribut pengukuran bagi tiga faktor utama iaitu ilmu pengetahuan yang akan dipindahkan, penerima ilmu pengetahuan dan medium pemindahan ilmu pengetahuan. Kajian ini mengaplikasikan kaedah survei untuk menentusahkan rangka kerja yang dicadangkan. Data-data yang diperolehi kemudiannya dianalisis menggunakan analisis statistik. Lima daripada lapan hipotesis telah terbukti disokong manakala tiga yang lain tidak disokong. Terdiri daripada tiga faktor utama bagi proses pemindahan ilmu pengetahuan yang efektif, rangka kerja ini juga memcadangkan atribut-atribut yang perlu bagi setiap faktor tersebut.

ACKNOWLEDGEMENTS

First and foremost, I would like to thank Allah for providing me guidance, strength, and courage to complete this thesis. I also like to convey my greatest gratitude to my dearest supervisor, Associate Professor Haji Mohd Hasan bin Selamat for all his continuous and invaluable advices, guidance, supports and encouragement in completing my research.

I would also like to express my gratitude to my supervisory committee member, Ms. Wan Nurhayati bt Wan Ab Rahman for guiding me throughout the completion of this research. I also want to thank Dr. Rusli bin Abdullah, Ms. Ainita bt Ban and Mr Mohd Farid bin Jaafar for their valuable personal comments during the preliminary and analysis stage of this research. Next, my gratitude goes to dear friends and colleagues who ever willing to listen to, help and support whenever I needed them. Many thanks to others not mentioned here.

My special thanks to my family in Kuala Lumpur especially to my mother, Ms Jamilah Mahfar and my father, Mr. Abdullah Taman for the encouragement, sacrifice and meaningful motivation throughout the journey of my research.

Last but not least, my deepest appreciation goes to the most important people in my life, my husband Sazly bin Anuar, my son, Iman Raziq and daughter, Iman Nuryasmin. My children have been my source of inspiration

all through. Thanks to my husband, who has been very loving, caring, understanding, and support that he provided throughout this research.

I certify that an Examination Committee has met on 29 June 2006 to conduct the final examination of Salfarina binti Abdullah on her Master of Science thesis entitled “A Framework for Measuring Knowledge Transfer Process in E-Learning Environment” in accordance with Universiti Pertanian Malaysia (Higher Degree) Act 1980 and Universiti Pertanian Malaysia (Higher Degree) Regulations 1981. The Committee recommends that the candidate be awarded the relevant degree. Members of the Examination Committee are as follows:

Azmi Jaafar, PhD

Associate Professor
Faculty of Computer Science and Information Technology
Universiti Putra Malaysia
(Chairman)

Rusli Abdullah, PhD

Lecturer
Faculty of Computer Science and Information Technology
Universiti Putra Malaysia
(Internal examiner)

Md. Nasir Sulaiman, PhD

Associate Professor
Faculty of Computer Science and Information Technology
Universiti Putra Malaysia
(Internal examiner)

Husniyati Hussin, PhD

Associate Professor
Kulliyah of Information and Communication Technology
International Islamic University of Malaysia
(External examiner)

HASANAH MOHD. GHAZALI, PhD

Professor/Deputy Dean
School of Graduate Studies
Universiti Putra Malaysia

Date:

This thesis submitted to the Senate of Universiti Putra Malaysia and has been accepted as fulfilment of the requirement for the degree of Master of Science. The members of Supervisory Committee as follows:

Haji Mohd Hasan bin Selamat

Associate Professor

Faculty of Computer Science and Information Technology

Universiti Putra Malaysia

(Chairman)

Wan Nurhayati bt Wan Ab Rahman

Lecturer

Faculty of Computer Science and Information Technology

Universiti Putra Malaysia

(Member)

AINI IDERIS, PhD

Professor/Dean

School of Graduate Studies

Universiti Putra Malaysia

Date:

DECLARATION

I hereby declare that the thesis is based on my original work except for quotations and citations, which have been duly acknowledged. I also declare that it has not been previously or concurrently submitted for any other degree at UPM or other institutions.
