Preface *xiii*

1	Quality Management in the Food Industry	1
1.1	Introduction	1
1.2	Definition of Quality Control	1
1.3	Quality Control in the Food Industry	2
1.3.1	Quality Control (Raw Material)	3
1.3.2	Quality Control in Production (Processes and End Product)	4
1.3.3	Issues Related to the Quality Control	6
1.3.3.1	Late Adopters	6
1.3.3.2	Difficulties Identifying and Prioritising Hazards (Microbiological and Chemical)	6
1.3.3.3	Lack of Scientific and Quantitative Method to Assess Critical Points	6
1.4	Quality Assurance	7
1.4.1	Current Good Manufacturing Practice (cGMP)	7
1.4.2	HACCP (Hazard Analysis of Critical Control Point)	8
1.4.3	ISO	9
1.4.4	British Retail Consortium	9
1.5	Quality Management System in the Food Industry	9
1.6	Statistical Thinking	10
1.7	Summary	12
2	Food Industry and its Contribution to the Global Economy	13
2.1	Introduction	13
2.2	What Is the Role of Food Industry in the Global Context?	14
2.3	Several Classifications of Food Industry from Several Sources	15
2.4	How is the Food Industry Different from Other Industries?	18
2.5	Customers and Consumers	19
2.6	Government Plan	20
2.7	Summary	20

3	Quality and Safety in the Food Industry	23
3.1	Introduction	23
3.2	Food Quality	25
3.2.1	Objective and Subjective Quality	25
3.3	Food Safety	27
3.4	Hazard Analysis and Critical Control Point (HACCP)	28
3.4.1	Concept	28
3.4.2	HACCP Principles	30
3.4.2.1	Principle 1	30
3.4.2.2	Principle 2	30
3.4.2.3	Principle 3	30
3.4.2.4	Principle 4	30
3.4.2.5	Principle 5	31
3.4.2.6	Principle 6	31
3.4.2.7	Principle 7	31
3.4.3	Hazards	32
3.4.3.1	Physical Contamination	32
3.4.3.2	Chemical Contamination	33
3.4.3.3	Microbiological Contamination	33
3.4.4	Documentation	34
3.4.5	Critical Control Point (CCP)	34
3.4.6	How to Do it?	34
3.4.6.1	Step 1: Develop HACCP Team	34
3.4.6.2	Step 2: Describe and Characterise the Product	35
3.4.6.3	Step 3: Construct the Process Flow Diagram	36
3.4.6.4	Step 4: Identify the Hazards Control	36
3.4.6.5	Step 5: Quantify and Analyse the Hazards	36
3.4.6.6	Step 6: Identify Control Requirements, Targets and Tolerances	37
3.4.6.7	Step 7: Identify CCPs and Assess Existing Controls	37
3.4.6.8	Step 8: Establish a Monitoring System for Each CCP	38
3.5	Good Manufacturing Practice	38
3.5.1	Personnel	39
3.5.2	Plant and Grounds	39
3.5.3	Sanitary Operation	40
3.5.4	Sanitary Facilities and Controls	40
3.5.5	Equipment and Utensils	40
3.5.6	Processes and Controls	40
3.5.7	Raw Materials	40
3.5.8	Warehousing and Distribution	41
3.6	Food and Drug Administration (FDA)	42
3.7	Summary	42

4	An Introduction of SPC in the Food Industry: Past, Present and Future	43
4.1	Statistical Process Control: A Brief Overview	43
4.2	Quality Control in the Food Industry: Before SPC	44
4.2.1	Inspection! Inspection! Inspection!	45
4.3	The Evolution of SPC in the Food Industry	48
4.4	The Principle of Current Quality Control	50
4.4.1	Control in Raw Material	50
4.4.2	Control in the Finished Product	51
4.4.3	Control in Processing	51
4.4.4	The Practicality of SPC in the Food Industry	53
4.5	Future of SPC: Organisational Learning Through Statistical Methods Application	55
4.6	Summary	60
5	Tools in SPC	61
5.1	Basic Quality Tools	61
5.2	SPC Tools	61
5.3	Cause-and-Effect Analysis	62
5.3.1	What?	62
5.3.2	Why?	62
5.3.3	When?	62
5.3.4	How?	62
5.3.5	Where?	64
5.4	Pareto Diagram	66
5.4.1	What?	66
5.4.2	Why?	66
5.4.3	When?	67
5.4.4	How?	67
5.4.5	Where?	69
5.5	Process Flowchart	69
5.5.1	What?	69
5.5.2	Why?	69
5.5.3	How?	69
5.5.4	When?	71
5.5.5	Where?	71
5.6	Histogram	71
5.6.1	What?	71
5.6.2	Why?	72
5.6.3	When?	72
5.6.4	How?	72
5.6.5	Where?	73

5.7	Scatter Diagram	73
5.7.1	What?	73
5.7.2	Why?	73
5.7.3	When?	73
5.7.4	How?	74
5.7.5	Where?	74
5.8	Control Chart	74
5.8.1	What?	74
5.8.2	How?	75
5.8.3	Assumptions	75
5.8.4	Why?	75
5.8.4.1	Process/Product Monitoring	75
5.8.4.2	Process Prediction	76
5.8.5	How?	76
5.8.6	Types of Control Charts	77
5.8.7	Variable Control Chart	77
5.8.7.1	Xbar Chart and R Chart or Xbar and S Chart	77
5.8.7.2	Exponentially Weighted Moving Average (EWMA) Chart	78
5.8.7.3	Cumulative Sum (CUSUM) Chart	79
5.8.8	Attribute Control Chart	80
5.8.8.1	Proportion Defective Chart (p-Chart)	80
5.8.8.2	Number Defective Chart (np-Chart)	81
5.8.8.3	c-Chart	81
5.8.8.4	U-Chart	82
5.8.9	Run Chart	82
5.8.10	Interpreting Control Chart Signals	83
5.8.11	Rules for Interpreting a Control Chart	83
5.8.12	Where?	84
5.9	Common Mistakes	85
5.10	Summary	86
6	Team Formation, Team Dynamics and Training	87
6.1	The Team	87
6.2	Team Dynamics	88
6.2.1	Team Structure	88
6.2.2	SPC Team Characteristics	91
6.2.3	Team Maturity	93
6.3	Training	94
6.4	Consultant	97
6.5	Follow-Up in-House Training	97
6.6	Measuring Training Effectiveness	98
6.7	Summary	100

7	SPC Readiness Self-Assessment Tool	103
7.1	Ready...?	103
7.2	Concept of Readiness	104
7.3	History of the Readiness Concept	105
7.4	An Approach to Assessing SPC Readiness in the Organisations	107
7.5	Key Components of SPC Readiness	108
7.6	Top Management Support	109
7.6.1	Capable Measurement System	109
7.6.2	Organisational Culture	109
7.6.3	Employee Involvement	110
7.6.4	Urgency to Change	111
7.7	Identifying the Readiness Level	112
7.7.1	How to Use the SPC Readiness Assessment Tool?	112
7.8	Summary	116
8	Critical Aspects in SPC Implementation Process	117
8.1	Introduction	117
8.2	Key Findings from an Empirical Study in the UK Food Manufacturing Industry	117
8.3	CSF of SPC Implementation	120
8.4	Gap Between the Importance of SPC and the Frequency of Actual Practice	122
8.5	Common Barriers to SPC Implementation	124
8.6	Process Performance Measurement	126
8.7	Summary	128
9	Roadmap for the Deployment of SPC	129
9.1	A Cookbook Approach	129
9.2	Phase Awareness: Sell the Program	129
9.2.1	Step 1: Top to Bottom	131
9.2.2	Step 2: SPC Awareness Sessions	133
9.2.3	Step 3: SPC Training	133
9.3	Phase Preparation	135
9.3.1	Step 4: Corporate SPC Vision Create/Creating a SPC Corporate Vision	135
9.3.2	Step 5: SPC Team Establishment	136
9.3.3	Step 6: Develop Strategic Plans for the SPC Implementation	137
9.4	Phase Initiation	138
9.4.1	Step 7: Process Prioritisation	138
9.4.2	Step 8: Process Description	139

9.4.3	Step 9: Process Synthesis	140
9.4.4	Step 10: Measurement System Analysis (MSA)	140
9.4.5	Step 11: Control Chart	141
9.4.6	Step 12: Establish Out-of-Control-Action-Plan (OCAP)	143
9.4.7	Step 13: Process Capability	144
9.4.8	Step 14: Reflection	146
9.5	Phase Institution: Company-Wide Implementation	147
9.5.1	Step 15: Communicate the Success of Initial Project	147
9.5.2	Step 16: Company-Wide Training	147
9.5.3	Step 17: Progress Evaluation Systems	148
9.6	Phase Sustainability	148
9.6.1	Step 18: Maintenance of In-house Expertise	148
9.6.2	Step 19: Towards Learning Organisation	149
9.6.3	Step 20: Reward System	149
9.7	Summary	150
10	Case Studies	151
10.1	Application of the Control Charts in the Industries	151
10.2	Case Study 1 Monitoring Fish Product Packaging (Grigg, Daly, and Stewart, 1998)	152
10.2.1	Problem Statement	152
10.2.2	Processes	152
10.2.3	Sampling	152
10.2.4	Type of Data	153
10.2.5	Construction of the Control Chart	154
10.2.5.1	Determine the Target Level	154
10.2.6	Interpret $\bar{x} - R$ Chart	154
10.2.7	Conclusion	156
10.3	Case Study 2 Monitoring the Sausage Production	156
10.3.1	Problem Statement	156
10.3.2	Processes	157
10.3.3	Sampling	158
10.3.4	Type of Data	158
10.3.5	Construct Control Chart	159
10.3.6	Interpreting the p -Chart	160
10.3.7	Conclusion	161
10.4	Case Study 3 Controlling Microbiological Hazards on the Food Products	161
10.4.1	Problem Statement	161
10.4.2	Process	162
10.4.3	Sampling	162
10.4.4	Type of Data	162
10.4.5	Construct Control Chart	162

10.4.5.1 Modification of the Data 162
10.4.6 Interpret the Charts 167
10.4.6.1 The Individuals Chart 167
10.4.6.2 The CUSUM Control Chart 167
10.4.7 Conclusion 168
